This book explores how, and if, formal education affects peacebuilding in post-conflict societies. As schooling is often negatively implicated in violent conflict, the author highlights the widely expressed need to 'build back better' and 'transform' schooling by changing both its structures and processes, and its curriculum. Drawing upon research from a wide range of post-conflict developing societies including Cambodia, Colombia and Kenya, the author examines whether there is any empirical support for the idea that schooling can be transformed so it can contribute to more peaceful and democratic societies. In doing so, the author reveals how the 'myth' of building back better is perpetuated by academics and international organisations, and explains why formal education in post-conflict developing societies is so impervious to radical change. This important volume will appeal to students and scholars of education in post-conflict societies.

The book looks into the South Asian experience of English language education in the first decade of the 21st century by examining its policies, practices and perspectives in Sri Lanka. It discusses the evolution of English from the language of administration of the former South Asian colony up to its present and intended, although poorly implemented, status as a "link-language" in Sri Lanka. The official removal of English as the language of administration after independence, the twists and turns of its practice in various domains over six decades, and the views of today's students and teachers reveal that there is more to English language education in a post-colonial context than current theories address. This book concentrates on what educationalists in English Language Teaching do, the goals that curriculum designers must capture, and how post-colonial attitudes towards English hinder the teaching of English as a second language. This book emphasizes that the general principles of teaching English as a second language need specific modifications at the delivery stage in South Asian societies.

This book evaluates the views of different ethnic groups towards the English language in Sri Lanka for a period of almost two centuries. While a few studies have addressed the subject of English in Sri Lanka in a general way, there has been no research showing the specifics of English usage in the major ethnic communities of the country. This text considers notions and attitudes towards English that prevail in Sri Lanka today among writers, language planners, teachers and students, habitual speakers, and infrequent users, as well as elite and non-elite groups in the country. The book also examines colonial and postcolonial writings in three communities, namely the Sri Lankan diaspora and the Tamil and Sinhala communities.

A country's education system plays a pivotal role in promoting economic growth and shared prosperity. Sri Lanka has enjoyed high school-attainment and enrollment rates for several decades. However, it still faces major challenges in the education sector, and these challenges undermine the country's inclusivegrowth goal and its ambition to become a competitive upper-middle-income country. The authors of Sri Lanka Education Sector Assessment: Achievements, Challenges, and Policy Options offer a thorough review of Sri Lanka's education sector—from early childhood education through higher education. With this book, they attempt to answer three questions: • How is Sri Lanka's education system performing, especially with respect to participation rates, learning outcomes, and labor market outcomes? • How can the country address the challenges at each stage of the education process, taking into account both country and international experience and also best practices? • Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary, and postsecondary education must be aligned to meet the increasingly complex education and skill requirements.

John Frith was one of the outstanding academics of his time. He had a clear logical mathematical mind, was highly respected and influenced many. Yet, in 1553, at the age of 30, he was burnt at the stake for writing books supporting doctrines of Reformation. This work discusses his life.

Brave New Teachers is a timely investigation of democratic teacher practice in culturally diverse school systems. Based on an original study of the Urban Diversity Teacher Education Program at York University, it investigates the extent to which graduates of a teacher education program grounded in the democratic principles of equity, diversity, and social justice can hold true to these principles in a climate of conservative school culture and state-mandated educational reform that focuses on standardization and accountability. The result is a critical Canadian perspective on both the challenges and the possibilities of working for social justice in the classroom.

This comprehensive and detailed survey of the first six centuries of Indian Buddhism sums up the results of a lifetime of research and reflection by one of Japan's most renowned scholars of Buddhism.
