Uganda Insect Industry: Farmers encouraged to feed insects
2015 Global Feed Survey Alltech

EXECUTIVE SUMMARY. 2015 marks the fourth consecutive year that Alltech has conducted this global feed survey. This undertaking has required a significant amount of work each year, mainly because the feed industry is measured differently and in varying degrees of thoroughness from country to country. Yet, each year, better information is discovered and more is learned about how farmers around the world feed their livestock.

2015 Global Feed Survey - Alltech

Register now to view the ninth annual Alltech Global Feed Survey results. Alltech's annual evaluation of compound feed production is the most complete of its kind, including data from more than 140 countries and approximately 30,000 feed mills, covering all species of production animals. Dr.

values in to consideration, the feed market increased in the last 3 years (because Alltech survey is for 2015) with 8,1% each year. As we all expected, the biggest feed production is in Asia where are more than 13.736 feed factories with a total feed production of 350 million tons.

Alltech 2015 global feed survey – Animal Feed Market

Alltech Global Feed Survey. 8th annual survey features data from 144 countries and 30,000 feed mills. Top 8 countries produce 55 percent of the world's feed production. Europe experiences overall growth of 4 percent; second-fastest-growing region

Alltech Global Feed Survey - Alltech

The regional and global implications are reflected by the Alltech Global Feed Survey and the decline in global feed production, said Lyons. "While pig feed production is down in affected countries, we are noting increased production both in other species as producers work to supplement the protein demand, and in non-affected countries as exports ramp up.

Alltech Global Feed Survey reveals first production ...

Now in its ninth year, the Alltech Global Feed Survey continues to

Online Library 2015 Global Feed Survey Alltech

serve as a valuable resource on the state of the global feed industry, drawing data from 145 countries and 30,000 feed mills. The survey sheds light not only on the challenges faced by our industry, but also on the opportunities we have to shape a strong future.

GLOBAL FEED SURVEY - Alltech

The Global Feed Survey assesses the compound feed production from more than 130 countries through information obtained in partnership with local feed associations and Alltech's sales team, who visit more than 32,000 feed mills annually.

Global Feed Survey | News - Alltech

Alltech Feed Survey: Trend reveals 14% increase in global feed tonnage over last five years The facts are undeniable. The world's population is set to skyrocket in the next few years and global consumers with more available cash flow are now filling their plates with protein.

Alltech Feed Survey: Trend reveals 14% increase in global ...

The Alltech Global Feed Survey assesses compound feed production and prices through information collected by Alltech's global sales team and in partnership with local feed associations. It is intended to

serve as an information resource for policymakers, decision makers and industry stakeholders.

Alltech 2017 Global Feed Survey

Now in its seventh year of analysis, the Alltech Global Feed Survey continues to be the most quoted reference on the state of the feed industry, with last year's survey data cited in more than 1,000 reports by the United Nations, industry market

The global feed industry - Alltech

The Alltech Global Feed Survey assesses compound feed production and prices through information collected by Alltech's global sales team and in partnership with local feed associations in the last quarter of 2018. It is an estimate and is intended to serve as an information resource for policymakers, decision-makers and industry stakeholders.

2019 Alltech Global Feed Survey Published | Alltech

A fresh survey from Alltech suggests that global Aqua feed production grew 1.4 % last year, accumulating to 41.5 million metric tons. Alltech also estimates the worth of the feed industry globally to be \$460 billion with a global production of 980 million metric tons, an increase of 2 % compared to last year.

Online Library 2015 Global Feed Survey Alltech

Global feed survey from Alltech shows growth for global ... Alltech President/CEO Dr. Mark Lyons shared the results of the company's latest global feed survey during a livestream presentation on January 27.. The 2020 Alltech Global Feed Survey estimates that international feed tonnage decreased by 1.07% to 1.126 billion metric tons of feed produced last year, due largely to African swine fever (ASF) and the decline of pig feed in the Asia-Pacific region.

Alltech Global Feed Survey Results | AgNewsWire

1. Feed production continues to consolidate. As the grand total of feed production broke through the 1 billion (metric tons) marker, it did so on the backs of fewer feed mills. A 3.7 percent increase in production over 2015 occurred despite a 7 percent decrease in the number of feed mills.

2017 Alltech Global Feed Survey

The Alltech Global Feed Survey assesses compound feed production and prices through information collected by Alltech's global sales team and in partnership with local feed associations in the last quarter of 2019. It is an estimate serving as a resource for policymakers, decision-makers and industry stakeholders. ...

industry resource for the coming year. A summary of the 2015 Alltech Global Feed can be downloaded [here](#).

New Aspects of Meat Quality: From Genes to Ethics provides a reference source that covers what constitutes meat quality in the minds of consumers, marketers, and producers in the 21st century, using the same scientific authority as texts on traditional meat quality values. Traditional measures in meat quality, such as texture, waterholding, color, flavor/aroma, safety/microbiology, and processing characteristics are still important, however, additional quality attributes now have huge importance in the purchasing intentions of consumers in many countries. These include, amongst others, animal welfare, the impacts of meat on human health, quality assurance schemes, organic/free range, ethical meat production, and the desirability of genetically modified organisms. The book is divided into three main sections, with the first section covering the developments in our understanding of how muscle structure affects the eating qualities of cooked meat. The second section highlights recently developed techniques for measuring, predicting, and producing meat quality, and how these new techniques help us minimize

Online Library 2015 Global Feed Survey Alltech

variability in eating quality and/or maximize value. The final section identifies the current qualities of consumer and public perceptions, and what is sustainable, ethical, desirable, and healthy in meat production and consumption. Brings together top researchers in the field to provide a comprehensive overview of the new elements of meat quality Provides a reference source that covers the new aspects of meat quality with the same scientific authority as texts on traditional meat quality values“/li> Edited by an extremely well respected expert in the field who is an Associate Editor of the journal Meat Science (published by Elsevier), the largest global journal within this area

Considering subjects as diverse yet interrelated as the earth's water resources, renewable energy sources, climate change, the demise of natural diversity, overpopulation, and malnutrition, this book collects and accessibly presents the most up-to-date research on subjects of major global concern from twelve leading scientists.

This book presents a 360-degree picture of the world of insects and explores how their existence affects our lives: the "good, bad, and ugly" aspects of their interactions with humankind. It provides a lucid introductory text for beginning undergraduate students in the

Online Library 2015 Global Feed Survey Alltech

life sciences, particularly those pursuing beginner courses in entomology, agriculture, and botany.

A clear illustration of the important role of aquaculture in supporting food security, livelihoods, and economic development around the world This new edition of *Aquaculture: Farming Aquatic Animals and Plants* covers important aspects of the culture of fish, shellfish, and algae in freshwater and marine environments. Subject areas covered include principles of aquaculture, water quality, environmental impacts of aquaculture, desert aquaculture, reproduction, life cycles and growth, genetics and stock improvement, nutrition and feed production, diseases, vaccination, post-harvest technology, economics and marketing, and future developments of aquaculture. Separate chapters also cover the culture of algae, carps, salmonids, tilapias, catfish, marine and brackish fishes, soft-shelled turtles, barramundi, marine shrimp, mitten crabs, and other decapod crustaceans, bivalves, gastropods, and ornamental species. This edition also provides greater coverage of aquaculture in China, reflecting the country's importance in the global scene. Providing core scientific and commercially useful information, and written by 35 eminent international authors, this expanded and fully updated Third Edition of *Aquaculture* is essential reading for all students

Online Library 2015 Global Feed Survey Alltech

and professionals studying and working in aquaculture. Fish farmers, hatchery managers, and those in aquaculture support and supply industries, such as feed manufacturing, will find an abundance of commercially useful information within this important and now established book. Describes the multitude of developments that have occurred within the aquaculture field over the last 15 years Includes a major revision of production statistics and trends, discussion of technical developments, and revised and extended coverage provided by broader international authorship Brings together 35 internationally recognized contributors, including a number of new contributors Aquaculture: Farming Aquatic Animals and Plants, Third Edition is a recommended text for students of the subject and a concise reference for those working in or entering into the industry.

This book is about important relevant recent research topics in sustainable aquaculture practices. A critical assessment of the sustainable fishing methods and the aspect of sustainable aquaculture feed is presented in this volume. A special focus has been given to socio-economic and environmental assessment of aquaculture practices and analysis of carbon footprint under an intensive aquaculture regime. Aquaponics as a niche for sustainable modern aquaculture has been highlighted. The effect of use of pharmaceuticals to prevent

Online Library 2015 Global Feed Survey Alltech

fish disease on the surrounding marine environment is an emerging area of concern, and a critical discussion on this aspect is included in the book. The spread of organic waste and nutrients released by fish farms to natural water bodies has raised considerable concerns. Therefore the methods to prevent their dispersion and removal (treatment) have been comprehensively covered in this book. This book is an essential read for academicians, researchers, and policy makers in the field of aquaculture.

This book examines the successful private, public and civil society models of agriculture value chains in India and addresses relevant challenges and opportunities to improve their efficiency and inclusiveness. It promotes the value-chain approach as a tool to improve access to finance for small holder farmers and discusses the possible structure of and regulatory framework for the 'National Common Agricultural Market'— a term that featured in the Indian Finance Minister's 2014–15 budget speech, and which is aimed towards standardizing and improving transparency in agricultural trade practices across states under a single licensing system. The book deliberates on the potential of developing innovative financial instruments into the value chain framework by supporting tripartite agreements between producers, lead firms and financial institutions.

Online Library 2015 Global Feed Survey Alltech

Its fourteen chapters are divided into three parts—Agriculture Value Chain Financing: Theoretical Framework, Agriculture Value Chain Financing in Cases of Select Commodities; and Institutional Framework for Agriculture Value Chain Financing. Since the concept of value chain financing is being considered as a future policy agenda, the book is of great interest to corporations dealing with agricultural inputs and outputs; commercial, regional, rural and cooperative banks; policy makers; academicians and NGOs.

The trade in live and dead animals and animal parts is a significant aspect of the global economy, but economic considerations are inevitably at odds with optimal animal welfare. Providing a snapshot of the current situation, this book discusses the background to modern international trade, welfare, and the environmental, economic and cultural issues. Covering farm, zoo and sport animals as well as the pet industry, the author draws together the competing interests and issues involved. Critically examining the overall ethics of the current situation and future of animal trade, he considers it within the context of food security, climate change, cultural sensitivities and consumer opinion.

Microalgae are a particularly interesting source of products that

Online Library 2015 Global Feed Survey Alltech

range from currently marketed human nutritionals and food ingredients, to potential sources of biofuels and animal feeds. Rapid advances in technology and commercial development are taking place worldwide. Importantly, algal cultivation does not compete with agriculture for land, water, and in some cases, fertilizer resources. *Microalgal Production for Biomass and High-Value Products* covers the field from a variety of perspectives with 14 chapters contributed by recognized academic experts and industrial practitioners. The book presents the latest technologies and innovations in algal biomass production, from cultivation in open ponds and photobioreactors, to strain selection, synthetic biology, pest control, harvesting, and processing. It explores novel algal products and addresses key issues, including markets, supply chains, business strategies, legal issues, current products, and future prospects. This book brings together the latest advances of interest to those already working in the field while providing an introduction to those beginning to learn about the promise of microalgae as a sustainable source of both specialty and commodity products. It gives stimulating overviews from many different perspectives that describe how laboratory and applied research are creating advances in commercial microalgae production. It also addresses the still many open questions and challenges in this field.

Online Library 2015 Global Feed Survey Alltech

Over the last two decades global production of soybean and palm oil seeds have increased enormously. Because these tropically rainfed crops are used for food, cooking, animal feed, and biofuels, they have entered the agriculture, food, and energy chains of most nations despite their actual growth being increasingly concentrated in Southeast Asia and South America. The planting of these crops is controversial because they are sown on formerly forested lands, rely on large farmers and agribusiness rather than smallholders for their development, and supply export markets. The contrasts with the famed Green Revolution in rice and wheat of the 1960s through the 1980s are stark, as those irrigated crops were primarily grown by smallholders, depended upon public subsidies for cultivation, and served largely domestic sectors. The overall aim of the book is to provide a broad synthesis of the major supply and demand drivers of the rapid expansion of oil crops in the tropics; its economic, social, and environmental impacts; and the future outlook to 2050. After introducing the dramatic surge in oil crops, chapters provide a comparative perspective from different producing regions for two of the world's most important crops, oil palm and soybeans in the tropics. The following chapters examine the drivers of demand of vegetable oils for food, animal feed, and biodiesel and introduce the

Online Library 2015 Global Feed Survey Alltech

reader to price formation in vegetable oil markets and the role of trade in linking consumers across the world to distant producers in a handful of exporting countries. The remaining chapters review evidence on the economic, social, and environmental impacts of the oil crop revolution in the tropics. While both economic benefits and social and environmental costs have been huge, the outlook is for reduced trade-offs and more sustainable outcomes as the oil crop revolution slows and the global, national, and local communities converge on ways to better managed land use changes and land rights.

Feed and fertilizer are significant costs in aquaculture operations and play an important role in the successful production of fish and other seafood for human consumption. This book reviews the key properties of feeds, advances in feed formulation and ingredient choices and the practicalities of feeding systems and strategies. Feed and Feeding Practices in Aquaculture provides an authoritative and comprehensive coverage of the topic and is an essential guide for nutritionists, farm owners and technicians in aquaculture, as well as those working in R&D in the feed production industry and academics/postgraduate students with an interest in the area. Reviews the key properties of aquafeed, advances in feed formulation and manufacturing techniques, and the practicalities of feeding systems

Online Library 2015 Global Feed Survey Alltech

and strategies Provides an overview of feed and fertilizer in aquaculture Covers feeding strategies and related issues in different areas of aquaculture
