Dora is the pseudonym given by Sigmund Freud to a patient whom he diagnosed with hysteria, and treated for about eleven weeks in 1900. Her most manifest hysterical symptom was aphonia, or loss of voice. The patient's real name was Ida Bauer; her brother Otto Bauer was a leading member of the Austro-Marxist movement. Freud published a case study about Dora, *Fragments of an Analysis of a Case of Hysteria*.

World's Classics  
Freud's most elucidating and divisive works. On one hand, it demonstrates Freud's ability to delve deep into the unconscious and to bring hidden thoughts to the surface.

~~Dora: An Analysis of a Case of Hysteria Study Guide ...~~

Dora: An Analysis of a Case of Hysteria appeared in 1905, and represents the "early" Freud in many respects. For instance, Freud's conviction that Dora's neurotic symptoms are related to sexual desires and experiences reflects his early concerns with connections between sexual problems and hysteria.

Another patient who sought help from Freud and whose story was published as a case study was Dora, a girl whose inexplicable cough led Freud to pursue psychological causes of her symptoms. Her treatment was reported by Freud in *Fragments of an Analysis of a Case of Hysteria* in 1905, five years after she had consulted Freud.

5. Freud turns the tables on the woman: he makes the victim of sexual advances into their perpetrator, but the woman must punish herself for these wishes. This punishment, this repression, creates Dora's hysterical symptoms. 6. Dora's hysteria = self-inflicted. It is caused by her self-repression of her own sexual desires, not by her disgust with Herr K's
