~~"A Scientific Romance," by Canadian author Ronald Wright, is the latest warning from the dystopia department. It's been only a few months since John Updike published "The End of Time." Century marks have a way of inspiring such portents. In fact, Wright's novel picks up where H.G. Wells left off in "The Time Machine" a hundred years ago.~~

~~Thus begins Ronald Wright's fine and fantastical novel A Scientific Romance. Romance can refer to an affair of the heart; it can also describe a heroic tale of extraordinary events. In A Scientific Romance, Wright plays on both possible meanings as he weaves a tragic story of betrayal and lost love into a larger narrative of time travel. Lambert, having lost the woman he loved, is reckless enough to test Wells's machine himself, catapulting 500 years into the future, where he finds London ...~~

~~This is an interesting concept novel used to drive home a point about technology and scientific hubris run rampant that eventually chokes our planet and all but destroys the human race. In 1999 David Lambert, really a rather wandering soul, is a museum curator who has lost the love of his life to Mad Cow disease and his best friend in a falling out over a nasty love triangle involving the same woman.~~

~~A Scientific Romance, Ronald Wright, Knopf, 1997, 309 pp. The premise of a sequel to H. G. Wells' The Time Machine could have been treated in any number of ways. A literal-minded approach would have been a Wells pastiche, and the opposite (the Hollywood approach, to be facetious) would throw out everything related to Wells, retaining the association only for marketing purposes.~~

~~The disaster, in the book " A Scientific Romance " by Ronald Wright, was global warming. That resulted in an apoploptic future where our cultures our peoples were not even remembered in its glory. Who was the real enaimy of this outcome? Was it us or nature. Was it our fate from our progession that drove us to this end?~~

~~Scientific romance is an archaic, mainly British term for the genre of fiction now commonly known as science fiction. The term originated in the 1850s to describe both fiction and elements of scientific writing, but it has since come to refer to the science fiction of the late nineteenth and early twentieth centuries, primarily that of Jules Verne, H. G. Wells and Arthur Conan Doyle. In recent years the term has come to be applied to science fiction written in a deliberately anachronistic style~~
