and string processing--including fifty algorithms every programmer should know.

Algorithms (4th Edition): Sedgewick, Robert, Wayne, Kevin ...

Description. This fourth edition of Robert Sedgewick and Kevin Wayne's Algorithms is one of the most popular textbooks on algorithms today and is widely used in colleges and universities worldwide. The algorithms in this book – including 50 algorithms every programmer should know – represent a body of knowledge developed over the last 50 years that has become indispensable,

- YouTube

I think the algorithms reading roadmap is:
Algorithms (Sedgewick) ->
CLRS -> Introduction to
Analysis of Algorithms ->
TAoCP. However, the huge
problem which makes me
voting 4 star for the book
is that some figures and
illustrates are rendered
badly (page 9, 675, 624,
621, 579, 576, 346, 326).
