Antiviral Compounds From Plants

Included is a discussion of synthetic analogues where appropriate. The book states that antiviral compounds in so-called medicinal plants may constitute some of their "active ingredients." It explains that many are photosensitizers, their antiviral activity dependent upon or augmented by light of specific wavelengths.

Antiviral Compounds From Plants | Taylor & Francis Group
Background and aims: Many antiviral compounds presently in clinical use have a narrow spectrum of activity, limited therapeutic usefulness and variable toxicity. There is also an emerging problem of resistant viral strains. This study was undertaken to examine the published literature on herbs and plants with antiviral activity, their laboratory evaluation in vitro and in vivo, and evidence of ...

HIV, hepatitis B virus (HepBV), and influenza A by blocking the virus replication [13] , [45] , [104] .

Natural Antiviral Compounds - ScienceDirect

In this study, the majority of plant extracts were found to have some antiviral activity and could inhibit IBV prior to and during infection. The ethanolic extracts had a mixture of compounds/fractions and it is possible that the antiviral activity of plants is decided by one or several compounds or combinations thereof . Future studies are needed to detect the compounds or fractions responsible for anti-IBV activity and to investigate the mechanism of their action.

In vitro antiviral activity of fifteen plant extracts ...

The inferences from scientific literature review, focusing on potential therapeutic consequences of medicinal plants on experimental models of HIV, HSV, influenza, hepatitis, and coxsackievirus have ascertained the curative antiviral potential of plants.

Antiviral potential of medicinal plants against HIV, HSV ... Punarnavine, hypoxanthine 9-L-arabinofuranoside, ursolic acid, boeravinone, punarnavoside and liirodendrin have been purified and elucidated in detail for their biological activity with antiviral properties. Large amount of potassium nitrate is mostly found in this plant. The entire plant has huge percentage of proteins and fats.

Read Book Antiviral Compounds From Plants

Plants represent a large, untapped, potential source of antiviral agents. Although there has been relatively few studies seeking antiviral agents from plants, those studies have revealed an unexpectedly frequent occurrence of antiviral activity in plants. A large number of compounds of varied chemical structures isolated from medicinal plants have been shown to possess antiviral activity. Thus, this chapter made an attempt to explore various antiviral compounds from plants for the ...
