Appropriate for courses in Auditing and Special Topics in Accounting at the college or university level.

Auditing is a second-year (upper-level) course directed at students in pursuit of a professional accounting designation-CA, GGA, and CMA. This innovative and easy-to-understand bestseller offers a mixture of auditing theory and practical applications for those who will work for auditing firms. It provides thorough coverage of the entire audit process, taking the reader step-by-step through an audit cycle, then showing how the process relates to all audit cycles. Reflecting the reality of today's working world, particularly the impact of technology on auditing procedures and techniques, the text has been thoroughly revised and updated, and is completely oriented to the practical

application of computers in the field of auditing. It addresses five major issues in this area that have imposed change on the auditing environment: use of computer systems by audit clients; types of computer-based systems used by audit clients; form of working papers used in general practice; student knowledge of automated systems; and integration of automated systems into the review questions, problems, and cases. Students will learn not only auditing procedures, but also how to analyze data.

How healthy are the boomers, the generation that makes up over one-third of the Canadian population, as they reach retirement age? Focusing on four health behaviours that have been proven to be major risk factors for disease – smoking, unhealthy exercise, obesity, and heavy drinking – the author examines the implications of several key lifestyle-health conundrums, most notably the paradoxical relationship between two decades of increasing exercise levels and a concurrent and significant rise in obesity. This in turn leads to questions about the eating habits of North Americans, and in particular, the quantity and quality of fast-food and convenience-food consumption, and how obesity impacts general health.

Students and beginning counselors get step-by-step guidance for developing the skills and techniques they need to effectively help their clients. This sixth edition of the best-selling *Learning the Art of Helping: Building Blocks and Techniques* emphasizes the techniques and skills necessary to be effective in the art of helping, from basic building blocks to advanced therapeutic techniques. The text is practical, innovative, and focused on the relationship between helper and client. The author incorporates the latest research on effective treatments, while offering an integrative perspective. The author's conversational tone is appealing to students, yet the book is carefully referenced for instructors. The goal is to make beginning helpers become "reflective practitioners." "Stop and
