A breakout is most likely occurring when candlesticks close above the band resistance or below the band support. Tip #5: Candle Close and Body above the S&R When using moving averages and trend lines (as mentioned in tip 4), it is a useful tactic to review the relationship of price action with the support or resistance (S&R) level.

Avoid False Breakouts with our 5 Key Breakout Tips

A breakout occurs when price clears a critical level on your chart. These levels could be a trend line, support, resistance, or a key Fibonacci level. Remember, levels on your chart are psychological and represent the sentiments of day traders at a respective price level. When you think of day trading breakouts, what comes to mind?
