The only local text in the market, Business Analysis and Valuation provides a framework for understanding and using financial statements for business students and practitioners. Developed specifically for students undertaking accounting valuation subjects, the text is unique in its approach which introduces and develops a framework for business analysis and valuation using financial statement data, then shows how to apply this framework to a variety of decision contexts. All chapters of this edition have been updated to include the latest regulations, practices and examples from both the financial markets and research. Industry insights from practitioners and other experts have been added to each chapter, giving students a practical, real-life understanding of how the content they are learning translates to the workplace. With an increased number of real-business Asia-Pacific case studies exploring various issues, including a running chapter example, and references to recent research in this field, the text offers local context and a practical and in-depth approach.

In an ever-changing strategic environment, it is essential to understand how accurately the financial statements filed by companies reflect the health and value of a business. This first Asia-Pacific adaptation of Palepu and Healy's Business Analysis and Valuation helps readers analyse any company's financial statements to reveal its true condition and value. This book provides insights into how business analysis and valuation are applied to a variety of business decision scenarios, including equity investment, credit risk evaluation, and corporate financing transactions. Features that make this text an invaluable resource in the teaching of Financial Statement Analysis include: a Comprehensive Framework for Financial Analysis, a Applications of Financial Statement Analysis, a Cases; Retains 23 Harvard Business School cases from the highly successful US edition, along with 4 regionally focused cases, a End-of-chapter questions.

Business Analysis and Valuation, Third IFRS Edition provides comprehensive coverage on how to use financial statement data in a variety of business analysis and valuation contexts. The text's key strength is that it both offers a framework for business analysis and valuation but also shows how this framework can be applied in a variety of decision-making contexts.The text is thoroughly IFRS based. For example, the chapters on accounting analysis prepare students for the task of analyzing IFRS-based financial statements; all numerical examples of accounting adjustments describe adjustments to IFRS-based financial statements; and the terminology used throughout is IFRS-consistent.Business Analysis and Valuation, Third IFRS Edition is ideal for modules in financial statement analysis taken by MBA students, Masters in Accounting students, Executive Program participants and upper level undergraduates in accounting and finance.

This text thoroughly discusses a series of techniques in financial statement analysis, such as business strategy analysis, accounting analysis, financial analysis (ratio and cash flow analysis), and prospective analysis (for forecasting and valuation). It comes complete with eleven full-sized cases based on real-world applications that give students hands-on experience and help them develop strong practical skills.

The best way to select emerging markets to exploit is to evaluate their size or growth potential, right? Not according to Krishna Palepu and Tarun Khanna. In Winning in Emerging Markets, these leading scholars on the subject present a decidedly different framework for making this crucial choice. The authors argue that the primary exploitable characteristic of emerging markets is the lack of institutions (credit-card systems, intellectual-property adjudication, data research firms) that facilitate efficient business operations. While such "institutional voids" present challenges, they also provide major opportunities-for multinationals and local contenders. Palepu and Khanna provide a playbook for assessing emerging markets' potential and for crafting strategies for succeeding in those markets. They explain how to: - Spot institutional voids in developing economies, including in product, labor, and capital markets, as well as social and political systems - Identify opportunities to fill those voids; for example, by building or improving market institutions yourself - Exploit those opportunities through a rigorous five-phase process, including studying the market over time and acquiring new capabilities Packed with vivid examples and practical toolkits, Winning in Emerging Markets is a crucial resource for any company seeking to define and execute business strategy in developing economies.

Utilise Excel 2013 capabilities to build effective financial models Using Excel for Business Analysis, Revised Edition provides practical guidance for anyone looking to build financial models. Whether for business proposals, opportunity evaluation, financial reports, or any other business finance application, this book shows you how to design, create, and test your model, then present your results effectively using Excel 2013. The book opens with a general guide to financial modelling, with each subsequent chapter building skill upon skill until you have a real, working model of your own. Financial tools, features, and functions are covered in detail from a practical perspective, and put in context with application to real-world examples. Each chapter focuses on a different aspect of Excel modelling, including step-by-step instructions that walk you through each feature, and the companion website provides live model worksheets that give you the real hands-on practice you need to start doing your job faster, more efficiently, and with fewer errors. Financial modelling is an invaluable business tool, and Excel 2013 is capable of supporting the most common and useful models most businesses need. This book shows you how to dig deeper into Excel's functionality to craft effective financial models and provide important information that informs good decision-making. Learn financial modelling techniques and best practice Master the formulas and functions that bring your model to life Apply stress testing and sensitivity analysis with advanced conditionals Present your results effectively, whether graphically, orally, or written A deceptively powerful application, Excel supports many hundreds of tools, features, and functions; Using Excel for Business Analysis eliminates the irrelevant to focus on those that are most useful to business finance users, with detailed guidance toward utilisation and best practice.

Business Analysis and Valuation IFRS edition richly informs on contemporary financial statement data use in various valuation tasks, balancing each concept against real-life scenarios. The text is entirely IFRS based and discussed how to get the most information out of IFRS based financial statements. The focus is not only on building a solid understanding of the latest theoretical approaches but to also place students in a confident position to apply them.

Financial statements are the basis for a wide range of business analysis. Managers, securities analysts, bankers, and consultants all use them to make business decisions. There is strong demand among business students for course materials that provide a framework for using financial statement data in a variety of business analysis and valuation contexts. BUSINESS ANALYSIS & VALUATION: USING FINANCIAL STATEMENTS, TEXT & CASES, 4E allows you to undertake financial statement analysis using a four-part framework-(1) business strategy analysis for developing an understanding of a firm's competitive strategy; (2) accounting analysis for representing the firm's business economics and strategy in its financial statements, and for developing adjusted accounting measures of performance; (3) financial analysis for ratio analysis and cash flow measures of operating; and (4) prospective analysis. Then, you'll learn how to apply these tools in a variety of decision contexts, including securities analysis, credit analysis, corporate financing policies analysis, mergers and acquisitions analysis, and governance and communication analysis. This text also offers one Harvard case per chapter as well as an entirely separate section (Section 4) for additional cases!

This text is about the methods used to value companies. It contains both analytical reviews of valuation models and evaluation of the data available for use in valuation models.
