Policy. 2 Public health need and practice. The importance of ensuring mothers and their babies are well nourished is widely recognised. A pregnant woman's nutritional status influences the growth and development of her fetus and forms the foundations for the child's later health (Gluckman et al. 2005). The mother's own health, both in the short and long term, also depends on how well nourished she is before, during and after pregnancy (DH 2004a).
