Combining Like Terms Worksheet With

For example: $4y + 7x - 5y + 3x$. The $5y$ carries the negative operator with it. When we combine this, we will end up with $-1y + 10x$. I like to urge students to underline like terms. If you have two like terms that involve the variable x and y , I would have them underline the x terms once. This would be followed by underlining the y terms twice.
