William Duggan's 2007 book, *Strategic Intuition*, showed how innovation really happens in business and other fields and how that matches what modern neuroscience tells us about how creative ideas form in the human mind. In his new book, *Creative Strategy*, Duggan offers a step-by-step guide to help individuals and organizations put that same method to work for their own innovations. Duggan's book solves the most important problem of how innovation actually happens. Other methods of creativity, strategy, and innovation explain how to research and analyze a situation, but they don't guide toward the next step: developing a creative idea for what to do. Or they rely on the magic of "brainstorming"—just tossing out ideas. Instead, Duggan

shows how creative strategy follows the natural three-step method of the human brain: breaking down a problem into parts and then searching for past examples to create a new combination to solve the problem. That's how innovation really happens. Duggan explains how to follow these three steps to innovate in business and any other field as an individual, a team, or a whole company. The crucial middle step—the search for past examples—takes readers beyond their own brain to a “what-works scan” of what others have done within and outside of the company, industry, and country. It is a global search for good ideas to combine as a new innovation. Duggan illustrates creative strategy through real-world cases of innovation that use the same method: from Netflix to Edison, from Google to Henry Ford. He also shows how to integrate creative strategy into other methods you might currently use, such as Porter's Five Forces or Design Thinking. Creative Strategy takes the mystery out of innovation and puts it within your grasp.

A unique, inspiring guide to building business strategy from the president of Sequent Learning Network A key element of a successful business strategy is originality, which can only be fueled by creativity and intuition. Many business leaders are taught to develop strategies by analyzing case study after case study of other

companies' already implemented strategies, and using those studies as a framework for developing their own strategic plans. However, in order to develop truly great strategies, business leaders must learn to tap into their own creative process and develop actionable strategies based on their intuition and instincts. Creative Strategy Generation is a step-by-step guide to creating truly original and successful business strategies by tapping into one's own creative potential. Modeled on Sequent Learning Network's popular strategy building consultation program, the book uses compelling stories and examples drawn from music composition to show you how to produce your own "strategic masterpieces."

The Business Skills Every Creative Needs! Remaining relevant as a creative professional takes more than creativity--you need to understand the language of business. The problem is that design school doesn't teach the strategic language that is now essential to getting your job done. Creative Strategy and the Business of Design fills that void and teaches left-brain business skills to right-brain creative thinkers. Inside, you'll learn about the business objectives and marketing decisions that drive your creative work. The curtain's been pulled away as marketing-speak and business jargon are translated into tools to help you: Understand client requests from a

business perspective Build a strategic framework to inspire visual concepts Increase your relevance in an evolving industry Redesign your portfolio to showcase strategic thinking Win new accounts and grow existing relationships You already have the creativity; now it's time to gain the business insight. Once you understand what the people across the table are thinking, you'll be able to think how they think to do what we do.

Three kinds of strategic ideas apply to human achievement: strategic analysis, where you study the situation you face; strategic intuition, where you get a creative idea for what to do; and strategic planning, where you work out the details of how to do it. For more than a decade, William Duggan has conducted pioneering research on strategic intuition. He now gives us this eye-opening book that shows how strategic intuition lies at the heart of great achievements throughout human history: the scientific and computer revolutions, women's suffrage, the civil rights movement, modern art, microfinance in poor countries, and more. Considering the achievements of people and organizations, from Bill Gates to Google, Copernicus to Martin Luther King, Picasso to Patton, you'll never think the same way about strategy again.

Advertising Creative is the first “postdigital” creative strategy and copywriting textbook in which digital technology is woven throughout every chapter. The book gets right to the point of advertising by stressing key principles and practical information students and working professionals can use to communicate effectively in this postdigital age. Drawing on personal experience as award-winning experts in creative advertising, Tom Altstiel and Jean Grow offer real-world insights on cutting-edge topics, including global, social media, business-to-business, in-house, and small agency advertising. In this Fourth Edition, Altstiel and Grow take a deeper dive into the exploration of digital technology and its implications for the industry, as they expose the pervasive changes experienced across the global advertising landscape. Their most important revelation of all is the identification of the three qualities that will define the future leaders of this industry: Be a risk taker. Understand technology. Live for ideas.

CREATIVE STRATEGY IN ADVERTISING provides everything students need to be successful as advertising professionals in today's fast-changing media environment. Focusing on the idea that good advertising always starts with an understanding of people and an awareness of their needs, the text advances through the creative process step by step.

It focuses first on the creative person, and then on strategy and problem solving. Complementing expert instruction with extensive examples of layouts and ad copy, this book gives students the necessary tools to create winning advertising strategies.

Now in its third edition, this comprehensive text offers a classroom-tested, step-by-step approach to the creative processes and strategies for effective integrated marketing communication (IMC). Blakeman covers key areas, from marketing plans, branding/positioning, and creative briefs to copywriting, design, and considerations for each major media format. Throughout, she explores visual and verbal tactics, along with the use of business theory and practices, and how these affect the development of the creative message. This user-friendly introduction walks students through the varied strands of IMC, including advertising, PR, direct marketing, and sales promotion, in a concise and logical fashion.

Great ideas don't just happen. Innovation springs from creative thinking—a method of the human mind that we can study and learn. In *The Art of Ideas*, William Duggan and Amy Murphy bring together business concepts with stories of creativity in art, politics, and history to provide a visual and accessible guide to the art and

science of new and useful ideas. In chapters accompanied by charming and inviting illustrations, Duggan and Murphy detail how to spark your own ideas and what to do while waiting for inspiration to strike. They show that regardless of the field, innovations happen in the same way: examples from history, presence of mind, creative combination, and resolution to action. The Art of Ideas features case studies and exercises that explain how to break down problems, search for precedents, and creatively combine past models to form new ideas. It showcases how Picasso developed his painting style, how Gandhi became the man we know today, and how Netflix came to disrupt the movie-rental business. Lavishly illustrated in an appealing artistic style, The Art of Ideas helps readers unlock the secret to creativity in business and in life.

How "Aha!" really happens. When do you get your best ideas? You probably answer "At night," or "In the shower," or "Stuck in traffic." You get a flash of insight. Things come together in your mind. You connect the dots. You say to yourself, "Aha! I see what to do." Brain science now reveals how these flashes of insight happen. It's a special form of intuition. We call it strategic intuition, because it gives you an idea for action—a strategy. Brain science tells us there are three kinds of intuition: ordinary, expert, and

Acces PDF Creative Strategy A Guide For Innovation Columbia Business School Publishing

strategic. Ordinary intuition is just a feeling, a gut instinct. Expert intuition is snap judgments, when you instantly recognize something familiar, the way a tennis pro knows where the ball will go from the arc and speed of the opponent's racket. (Malcolm Gladwell wrote about this kind of intuition in Blink.) The third kind, strategic intuition, is not a vague feeling, like ordinary intuition. Strategic intuition is a clear thought. And it's not fast, like expert intuition. It's slow. That flash of insight you had last night might solve a problem that's been on your mind for a month. And it doesn't happen in familiar situations, like a tennis match. Strategic intuition works in new situations. That's when you need it most. Everyone knows you need creative thinking, or entrepreneurial thinking, or innovative thinking, or strategic thinking to succeed in the modern world. All these kinds of thinking happen through flashes of insight strategic intuition. And now that we know how it works, you can learn to do it better. That's what this book is about. Over the past ten years, William Duggan has conducted pioneering research on strategic intuition and for the past three years has taught a popular course at Columbia Business School on the subject. He now gives us this eye-opening book that shows how strategic intuition lies at the heart of great achievements throughout human history: the scientific and computer revolutions, women's suffrage, the civil

rights movement, modern art, microfinance in poor countries, and more. Considering the achievements of people and organizations, from Bill Gates to Google, Copernicus to Martin Luther King, Picasso to Patton, you'll never think the same way about strategy again. Three kinds of strategic ideas apply to human achievement: * Strategic analysis, where you study the situation you face * Strategic intuition, where you get a creative idea for what to do * Strategic planning, where you work out the details of how to do it. There is no shortage of books about strategic analysis and strategic planning. This new book by William Duggan is the first full treatment of strategic intuition. It's the missing piece of the strategy puzzle that makes essential reading for anyone interested in achieving more in any field of human endeavor.

Creative Industry practices are increasingly manifested through hybrid models and methods and emerging sub-sectors. With ever finer dividing lines between form and content, product and service, participation and consumption, the distinctions between sectors are increasingly blurred, while new, convergent models emerge. Reflecting this fluid context, this book provides a new perspective on strategy in the Creative Industries. Based on extensive original research and live empirical data derived from case studies, interviews, and

observations with creative managers, it reveals strategic decision-making by analysing business manoeuvres and stages of innovation in the Creative Industries. Through analysing the interactive features of aesthetically driven information assets, and how new user/consumer cultures are applied, it uncovers the principles that are transforming strategy in the Creative Industries. This innovative volume will be of significant interest to scholars, advanced students and practitioners in the Creative Industries as well as well as industry consultancies and practitioners.
