The earliest known use of cryptography is found in non-standard hieroglyphs carved into the wall of a tomb from the Old Kingdom of Egypt circa 1900 BC. These are not thought to be serious attempts at secret communications, however, but rather to have been attempts at mystery, intrigue, or even amusement for literate onlookers.

Cryptography originally deals with the problem of encrypting messages so that nobody but the authorised person can decrypt and read it. It has been used throughout the last 2000 years, but the methods and the problematic have become more and more elaborate. Often codes that were believed to guarantee secrecy were in fact not too difficult to break.
