Passing med-math class may require getting only 80% of test problems right, but coming up with the right answer only four out of five times isn't good enough when real patients are at risk. While mistakes can still be made using any technique, dimensional analysis does the best job of minimizing them. The only fault lies in the name.](#)

Dimensional Analysis, also know as stoichiometry or the railroad method, is the only technique I recommend when solving dosage calculation equations in nursing school. I love dimensional analysis for 4 main reasons: 1. It ' s ridiculously simple to set-up 2. It makes it super easy to actually do the calculations 3. It works with just about every dose calc problem imaginable 4. It is pretty full proof that you ' ll come up with the right answer 5. Keeps me from crying in a corner every time I ...
