Ruby API (v2.7)

Returns a new array. In the first form, if no arguments are sent, the new array will be empty. When a size and an optional obj are sent, an array is created with size copies of obj.Take notice that all elements will reference the same object obj.. The second form creates a copy of the array passed as a parameter (the array is generated by calling #to_ary on the parameter).

Index of Files, Classes & Methods in Ruby 2.7.2 (Ruby 2.7.2)

Ruby was created by Yukihiro Matsumoto (Matz) in Japan. Since 1995, its popularity in Japan has grown at an astounding rate; there are rumors that Ruby is more popular than Python in Japan. But to date, much of the detailed Ruby documentation is in Japanese. It probably isn't a programming language you'd just stumble across.

Programming Ruby: The Pragmatic Programmer's Guide

Returns a new array. With no block and no arguments, returns a new empty Array object. With no block and a single Array argument array, returns a new Array formed from array:. a = Array. new ([: foo, 'bar', 2]) a. class # => Array a # => [:foo, "bar", 2]. With no block and a single Integer argument size, returns a new Array of the given size whose elements are all nil:

Class: Array (Ruby 2.7.2)

Ruby sets close-on-exec flags of all file descriptors by default since Ruby 2.0.0. So you don't need to set by yourself. Also, unsetting a close-on-exec flag can cause file descriptor leak if another thread use fork() and exec() (via system() method for example). If you really needs file descriptor inheritance to child process, use spawn ...
