The study of economics begins with the idea that people cannot have everything they need and want. To look at the world economically, we can focus on the decisions that people make. At its core, economics is the study of how people choose to use their limited resources. Because people act individually, in groups (such as businesses), and through governments,

The key to flexible, skillful decision making in dialectical behavior therapy (DBT) lies in understanding the connections between moment-to-moment clinical strategies and core principles. This lucid guide from leading DBT authority Charles R. Swenson offers clinicians a compass for navigating challenging clinical situations and moving therapy forward--even when change seems impossible. Numerous vivid case examples illustrate DBT in action and show how to use skills and strategies that flow directly from the fundamental paradigms of acceptance, change, and dialectics. Clinicians gain knowledge and confidence for meeting the complex needs of each client while implementing DBT with fidelity.

#1 New York Times Bestseller “ Significant...The book is both instructive and surprisingly moving. ” —The New York Times Ray Dalio, one of the world ’ s most successful investors and entrepreneurs, shares the unconventional principles that he ’ s developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine ’ s list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater ’ s exceptionally effective culture, which he describes as “ an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency. ” It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In Principles, Dalio shares what he ’ s learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book ’ s hundreds of practical lessons, which are built around his cornerstones of “ radical truth ” and “ radical transparency, ” include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating “ baseball cards ” for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they ’ re seeking to achieve. Here, from a man who has been called both “ the Steve Jobs of investing ” and “ the philosopher king of the financial universe ” (CIO magazine), is a rare opportunity to gain proven advice unlike anything you ’ ll find in the conventional business press.

Ecological economics can help create the future that most people want – a future that is prosperous, just, equitable and sustainable. This forward-thinking book lays out an alternative approach that places the sustainable wellbeing of humans and the rest of nature as the overarching goal. Each of the book ’ s chapters, written by a diverse collection of scholars and practitioners, outlines a research and action agenda for how this future can look and possible actions for its realisation.
