With its lively narrative and emphasis on the most current topics and findings in the field, *The Human Species* explores the major questions that concern biological anthropologists about our species.

UNDERSTANDING HUMANS: INTRODUCTION TO PHYSICAL ANTHROPOLOGY AND ARCHAEOLOGY shows students how anthropologists and archaeologists go about their work as they study human evolution, living nonhuman primates, human adaptation and variation, the origin and dispersal of modern humans, food production, the first civilizations of the Old and New Worlds, and so much more. The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award—enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. *Essentials of Social Statistics for a Diverse Society, Third Edition*, is a more streamlined, less expensive version of the successful *Social Statistics for a Diverse Society*. As in the parent text, the *Essentials* version does more than introduce students to the statistical techniques used by social scientists. It is distinct for the use of real data from contemporary social issues, illustrating the interplay between social concerns and methods of inquiry, and for a strong emphasis on race, class, gender, and other statuses to show how statistics can be a tool for understanding the richness of social differences within society. With a wide range of examples and exercises taken from current events and published research, frequent illustrations, and a focus on student learning, this book continues to be an accessible and engaging resource for students. "This textbook, aimed at advanced undergraduates and postgraduates in paleoanthropology courses, tackles a rather difficult task—that of presenting the substantial body of paleontological, genetic, geological and archaeological evidence regarding human evolution, and the associated scientific history, in a logical and readable way without sacrificing either clarity or detail... the sheer quality of the writing and explanatory synthesis in this book will undoubtedly make it a valuable resource for students for many years." —*PaleoAnthropology*, 2010 This book focuses on the last ten million years of human history, from the hominoid radiations to the emergence and diversification of modern humanity. It draws upon the fossil record to shed light on the key scientific issues, principles, methods, and history in paleoanthropology.
