What would it be like to really savor your food? Instead of grabbing a quick snack on your way out the door or eating just to calm down at the end of a stressful day, isn't it about time you let yourself truly appreciate a satisfying, nourishing meal? In our modern society, weight concerns, obesity rates, and obsession with

changed the way we
look at food—and not
necessarily for the
better. If you have ever
snacked when you

have cut calories even
when you felt hungry,
you have experienced
“mindless” eating
firsthand. This mindless

approach to food is dangerous, and can have serious health and emotional

consequences. But if you've been mindlessly eating all your life, it can be difficult to make a change. When it comes down to it, you must take a whole new approach to eating—but where do you begin?

Practicing mindful

eating habits may be just the thing to make that important change. In fact, it might just be the answer you've been searching for all these years. The breakthrough approaches in *Eating Mindfully*, by Susan Albers, use mindfulness-based psychological practices to take charge of cravings so they can eat when they are

hungry and stop when they feel full. Ten years after the release of the first edition, this book continues to help thousands of readers change the way they approach mealtime. So what's changed? For starters, there is a new section that focuses on the "occasional mindless eater." This second edition

emphasizes that mindful eating isn't only for those on a diet or for those who have severely problematic eating habits—it's for everyone. In addition, this new edition features over 50 new tips for eating mindfully. Inside, you will learn how to be more aware of what you eat, get to know your fullness and hunger

When he was three years old, Tito was diagnosed as severely autistic, but his remarkable mother, Soma, determined that he would overcome the “problem” by teaching him to read and write.

The result was that between the ages of eight and eleven he wrote stories and poems of exquisite beauty,

which Dr. Oliver Sacks called “amazing and shocking.” Their eloquence gave lie to all our assumptions about autism. Here Tito goes even further and writes of how the autistic mind works, how it views the outside world and the “normal” people he deals with daily, how he tells his stories to the mirror and hears stories

With this work, Tito—whom Portia Iversen, co-founder of Cure Autism Now, has described as “a window into autism such as the world has never seen”—gives the world a beacon of hope.
