The accounting information is financial data about business transactions expressed in monetary terms. Or Accounting has been referred to as the process of identifying, measuring and communicating economic information to permit informed judgement and decisions by the users of information. The distinction between Accounting and book-keeping.

~~Introduction to Accounting notes - Financial Accounting ...~~

Concept of financial accounting: In general way, financial accounting is the statement of information about a business or other type of organization so that executives or staff can assess its financial growth and future results. The purpose of financial accounting is to ascertain the results (profit or loss) of business operations during the particular period and to state the financial position (balance sheet) as on a date at the end of the period.

~~Financial Accounting, Financial Accounting Notes ...~~

Accounting is a comprehensive system to collect, analyze, and communicate financial information. The origin of accounting is as old as money. In early days, the number of transactions were very small, so every concerned person could keep the record of transactions during a specific period of time.
