Master The Art of Livening Up Living Spaces And Special Events With This Unconventional And Powerful Guide To Floral Design. Floral design can be surprisingly difficult. It may look easy at first--since flowers are already beautiful, throwing together a few flowers and making a bouquet should be easy and pleasing to the eye--but that's not often the case. Coupled with the dearth of authoritative information on floral design, it easy to see why a lot of floral patterns may look colorful, but lack depth and a certain something that gives a flower arrangement that conveys a tangible feeling, atmosphere or mood. Unlike other books on floral design, most of which are often outdated and ill-adapted for the tastes of the modern world, Rebecca Wellner and Bo Morgan have teamed up to create a masterpiece on floral design that is as timeless as it's effective. While other books focus on step-by-step instruction on how to create particular floral designs, Wellner and Morgan show you how to actually think about floral design like an expert and intuitively make floral arrangements that are perfect for any and every occasion. Here's a preview of what you're going to discover in this guide: The five basic elements required for breathtaking floral designs Essential floral design tools you need to have How to think about colors and matching the right colors for your floral arrangement Foolproof flower identification guide to help you pick the right flowers for any event Mind-blowing floral arrangements for any event and how you can make them ...and tons more! Although designed for beginners and jam-packed with creative insights and indispensable techniques, Floral Design: A Beginner's Guide To Floral Arrangements contain a wealth of effective advice that can be implemented by anyone, regardless of skill level. Ready to take your floral design skills to the next level with awe-inspiring arrangements? Scroll up and click the button to purchase now!

An increased understanding of the developmental physiology, biochemistry, and molecular biology during early growth, maturation, ripening, and postharvest conditions has improved technologies to maintain the shelf life and quality of fruits, vegetables, and flowers. *Postharvest Biology and Technology of Fruits, Vegetables, and Flowers* provides a comprehensive introduction to this subject, offering a firm grounding in the basic science and branching out into the technology and practical applications. An authoritative resource on the science and technology of the postharvest sector, this book surveys the body of knowledge with an emphasis on the recent advances in the field.

'The Whiteman' is one of the most powerful and pervasive symbols in contemporary American Indian cultures. Portraits of 'the Whiteman': linguistic play and cultural symbols among the Western Apache investigates a complex form of joking in which Apaches stage carefully crafted imitations of Anglo-Americans and, by means of these characterizations, give audible voice and visible substance to their conceptions of this most pressing of social 'problems'. Keith Basso's essay, based on linguistic and ethnographic materials collected in Cibecue, a Western Apache community, provides interpretations of selected joking encounters to demonstrate how Apaches go about making sense of the behaviour of Anglo-Americans. This study draws on theory in symbolic anthropology, sociolinguistics, and the dramaturgical model of human communication developed by Erving Goffman. Although the assumptions and premises that shape these areas of inquiry are held by some to be quite disparate, this analysis shows them to be fully compatible and mutually complementary.
