field of Critical Applied Linguistics (CAL), Egado's research is composed by an extended literature review, where he carefully approached a detailed panorama of CAL nowadays, giving us a better understanding on where his investigation sits and which gaps it fills. Besides that, he discussed the themes mentioned in the title, which are derived from a Paradigmatic and Syntagmatic analysis – both a method and a methodology for qualitative research – that shows total connection between the theory presented and the data analyzed making the book even more interesting. Other aspects of this

investigation are worth to be cited, for instance, the ethical procedures used with the participants and the deep analysis brought by author, demonstrating the importance of researching gender, ethnic and prejudice in the educational sphere. I believe this work will be a great support for professors, students and researchers concerned with issues related to teacher training processes, as we can clearly see how the teacher dealt with students' responses. Also, it is a valuable source for the ones interested in studies about cognition, especially those inserted in CAL. Juliane

This Selected Issues paper considers the case of Poland to analyze global financial spillovers to emerging market (EM) sovereign bond markets. Foreign holdings of Polish government bonds have increased substantially over the last decade. Although foreign participation in local-currency sovereign bond markets provides an additional source of financing and reduces sovereign yields, it

has also given rise to concerns about increased sensitivity to shifts in market sentiment. The analysis in this paper suggests that foreign participation plays an important role in transmitting global financial shocks to local-currency sovereign bond markets by increasing yield volatility and, beyond a certain threshold, amplifying these spillovers.

Venice, Italy, in October 2015. The 22 revised full papers and 6 short papers presented were carefully reviewed and selected from 81 submissions. The papers deal with the topics related to the theme of the conference: "The mobile learning voyage: from small ripples to massive open waters". The conference theme paid tribute to the developments that brought mobile learning from its infancy steps in the early 2000s to maturity in 2015, while simultaneously paving the way for the broad and open waters ahead with new developments and progress in mobile learning, and emerging ambient technologies.

The second edition of this well-received volume has been revised and updated to reflect the advances in pathological classification and molecular epidemiology of diffuse low-grade gliomas (DLGG) in adults and offers an updated review on individualized therapies. This book presents the latest research pertaining to the diagnosis, genetics, therapy and management of DLGGs. It extensively covers recent research on the natural history of DLGGs and their interaction with the brain and reviews the new diagnostic and therapeutic strategies

which increase survival and quality of life of the patient. New topics covered are the management of DLGGs during pregnancy, functional rehabilitation of patients with DLGG and the onco-functional balance in DLGG, among others. The reader will have the opportunity to gain insight in both clinical and basic science aspects of this type of tumor and learn about the application of novel imaging techniques such as diffusion tensor imaging. Edited by a leading expert in the field and authored by a team of recognised specialists, this book is a valuable resource for medical oncologists,

This richly illustrated book will help presurgically diagnose pediatric/young adult tumors. The content is divided into two parts. The first part shows step-by-step how to perform a small volume specimen such as fine needle aspiration/core needle biopsy and how to correlate the morphology with the clinical, radiological, and/or molecular information. In turn, the second part presents a comprehensive overview of the various tumor entities. The content represents diagnostic modalities from the

major diagnostic centers worldwide, and is supplemented by the authors` 25 years of experience in diagnosing pediatric tumors. This book will successfully guide practitioners, researchers and oncology pediatricians through the process of sample harvesting and diagnosing. Pediatric tumors represent a large variety of lesions including pseudotumors of inflammatory and non-inflammatory origin, various types of lymphadenopathy, benign lesions, specific sarcomas, and blastemal malignancies. These age-specific and histotype-specific tumors of various origin, evolution and prognosis are
