empire collapsing and Stalin's on the rise, US officials under new Secretary of State George C. Marshall set out to reconstruct western Europe as a bulwark against communist authoritarianism. Their massive, costly, and ambitious undertaking would confront Europeans and Americans alike with a vision at odds with their history and self-conceptions. In the process, they would drive the creation of NATO, the European Union, and a Western identity that continue to shape world events. Benn Steil's "thoroughly researched and well-written account" (USA TODAY) tells the story behind the birth of the Cold War, told with verve, insight, and resonance for today. Focusing on the critical years 1947 to 1949, Benn Steil's gripping narrative takes us through the seminal episodes marking the collapse of postwar US-Soviet

relations—the Prague coup, the Berlin blockade, and the division of Germany. In each case, Stalin’s determination to crush the Marshall Plan and undermine American power in Europe is vividly portrayed. Bringing to bear fascinating new material from American, Russian, German, and other European archives, Steil’s account will forever change how we see the Marshall Plan. “Trenchant and timely...an ambitious, deeply researched narrative that...provides a fresh perspective on the coming Cold War” (The New York Times Book Review), *The Marshall Plan* is a polished and masterly work of historical narrative. An instant classic of Cold War literature, it “is a gripping, complex, and critically important story that is told with clarity and precision” (The Christian Science Monitor).

Heavily armed and formidable, guided missile cruisers formed the core of the Soviet Navy during the Cold War. From the last class of conventional Sverdlov-class cruisers through to increasingly complex and formidable missile cruisers, these ships ensured that NATO took the Soviet naval threat seriously. Soviet Cold War Guided Missile Cruisers covers all classes of these impressive warships, from the early Sverdlov through the Kynda, Kresta, Kara and Slava to the enormous Kirov classes. Together, these vessels marked the apogee of Soviet naval technology and capability and they remain today the largest non-aircraft carrier warships built since 1945. Containing material previously only available in Russian and fully researched from specialist defence journals, this

comprehensive volume examines the design, development, and intended role of these impressive, hi-tech warships, and recounts their dramatic operational history as NATO and Soviet warships faced off against each other during the long Cold War at sea.

Even fifteen years after the end of the Cold War, it is still hard to grasp that we no longer live under its immense specter. For nearly half a century, from the end of World War II to the early 1990s, all world events hung in the balance of a simmering dispute between two of the greatest military powers in history. Hundreds of millions of people held their collective breath as the United States and the Soviet Union, two national ideological entities, waged proxy wars to determine spheres

of influence—and millions of others perished in places like Korea, Vietnam, and Angola, where this cold war flared hot. Such a consideration of the Cold War—as a military event with sociopolitical and economic overtones—is the crux of this stellar collection of twenty-six essays compiled and edited by Robert Cowley, the longtime editor of *MHQ: The Quarterly Journal of Military History*. Befitting such a complex and far-ranging period, the volume's contributing writers cover myriad angles. John Prados, in “The War Scare of 1983,” shows just how close we were to escalating a war of words into a nuclear holocaust. Victor Davis Hanson offers “The Right Man,” his pungent reassessment of the bellicose air-power zealot Curtis LeMay as a man whose words were judged more critically than his actions. The secret war also

gets its due in George Feiffer's "The Berlin Tunnel," which details the charismatic C.I.A. operative "Big Bill" Harvey's effort to tunnel under East Berlin and tap Soviet phone lines—and the Soviets' equally audacious reaction to the plan; while "The Truth About Overflights," by R. Cargill Hall, sheds light on some of the Cold War's best-kept secrets. The often overlooked human cost of fighting the Cold War finds a clear voice in "MIA" by Marilyn Elkins, the widow of a Navy airman, who details the struggle to learn the truth about her husband, Lt. Frank C. Elkins, whose A-4 Skyhawk disappeared over Vietnam in 1966. In addition there are profiles of the war's "front lines"—Dien Bien Phu, the Cuban Missile Crisis, the Bay of Pigs—as well as of prominent military and civil leaders from both sides, including Harry S. Truman, Nikita

Encompassing so many perspectives and events, *The Cold War* succeeds at an impossible task: illuminating and explaining the history of an undeclared shadow war that threatened the very existence of humankind.

A thought-provoking and penetrating account of the post-Cold war follies and delusions that culminated in the age of Donald Trump from the bestselling author of *The Limits of Power*. When the Cold War ended with the fall of the Berlin Wall, the Washington establishment felt it had prevailed in a world-historical struggle. Our side had won, a verdict that was both decisive and irreversible. For the world's "indispensable

nation,” its “sole superpower,” the future looked very bright. History, having brought the United States to the very summit of power and prestige, had validated American-style liberal democratic capitalism as universally applicable. In the decades to come, Americans would put that claim to the test. They would embrace the promise of globalization as a source of unprecedented wealth while embarking on wide-ranging military campaigns to suppress disorder and enforce American values abroad, confident in the ability of U.S. forces to defeat any foe. Meanwhile, they placed all their bets on the White House to deliver on the promise of their Cold War triumph: unequaled prosperity, lasting peace, and absolute freedom. In *The Age of Illusions*, bestselling author Andrew Bacevich takes us from that moment of seemingly ultimate

victory to the age of Trump, telling an epic tale of folly and delusion. Writing with his usual eloquence and vast knowledge, he explains how, within a quarter of a century, the United States ended up with gaping inequality, permanent war, moral confusion, and an increasingly angry and alienated population, as well, of course, as the strangest president in American history.

In America, communist threats are seen everywhere and a committee is formed in the nation's capital to investigate those threats. Larry Dane Brimner follows the story of 19 men--all from the film industry--who are summoned to appear before the House of Representatives Committee on Un-American Activities. All 19 believe that the committee's investigations into their political views and personal associations are a violation of their First Amendment rights. When the first 10 of these men refuse to give the committee the simple answers it wants, they are cited for contempt of Congress and blacklisted.

The first novel in a new Cold War fantasy series, where the Berlin Wall is made entirely of magic. When a breach unexpectedly appears in the wall, spies from both sides swarm to the city as World War III threatens to spark. AFTER THE WAR, THE WALL BROUGHT AN UNEASY PEACE. When Soviet magicians conjured an arcane wall to blockade occupied Berlin, the world was outraged but let it stand for the sake of peace. Now, after ten years of fighting with spies instead of spells, the CIA has discovered the unthinkable... THE WALL IS FAILING. While refugees and soldiers mass

along the border, operatives from East and West converge on the most dangerous city in the world to either stop the crisis, or take advantage of it. Karen, a young magician with the American Office of Magical Research and Deployment, is sent to investigate the breach in the Wall and determine if it can be fixed. Instead, she discovers that the truth is elusive in this divided city--and that even magic itself has its own agenda. THE TRUTH OF THE WALL IS ABOUT TO BE REVEALED.

War--or the threat of war--usually strengthens states as governments tax, draft soldiers, exert control over industrial production, and dampen internal dissent in order to build military might. The United States, however, was founded on

the suspicion of state power, a suspicion that continued to gird its institutional architecture and inform the sentiments of many of its politicians and citizens through the twentieth century. In this comprehensive rethinking of postwar political history, Aaron Friedberg convincingly argues that such anti-statist inclinations prevented Cold War anxieties from transforming the United States into the garrison state it might have become in their absence. Drawing on an array of primary and secondary sources, including newly available archival materials, Friedberg concludes that the "weakness" of the American state served as a profound source of national strength that allowed the United States to outperform and outlast its supremely centralized and statist rival: the Soviet Union. Friedberg's analysis of the U. S. government's

approach to taxation, conscription, industrial planning, scientific research and development, and armaments manufacturing reveals that the American state did expand during the early Cold War period. But domestic constraints on its expansion--including those stemming from mean self-interest as well as those guided by a principled belief in the virtues of limiting federal power--protected economic vitality, technological superiority, and public support for Cold War activities. The strategic synthesis that emerged by the early 1960s was functional as well as stable, enabling the United States to deter, contain, and ultimately outlive the Soviet Union precisely because the American state did not limit unduly the political, personal, and economic freedom of its citizens. Political scientists, historians, and general readers

Faced with an increasingly formidable anti-ship cruise missile threat from the Soviet Union in the early days of the Cold War, and with the recent memory of the kamikaze threat from World War II, the USN placed a great priority on developing air defence cruise missiles and getting them to sea to protect the fleet. The first of these missiles were sizable, necessitating large ships to carry them and their sensors, which resulted in the conversion of a mix of heavy and light

cruisers. These ships, tasked with protecting carrier groups and acting as flagships, entered service from 1955 and served until 1980. The cruisers served in the front lines of the Cold War and many saw combat service, engaging in surface actions from Vietnam to the Persian Gulf. Complementing the conventionally-powered missile cruisers was a much smaller number of expensive nuclear-powered cruisers, including the Long Beach, the USN's largest-ever missile cruiser. Until replaced by the Ticonderoga and Burke classes of Aegis ships, the USN's 38 missile cruisers were the most capable and important surface combatants in the fleet and served all over the globe during the Cold War. Using specially commissioned artwork and meticulous research, this illustrated title explores the story of these cruisers in
