The Impact of E-learning in Education - Claromentis

E-learning is superior to traditional learning when it comes to reduction of training time, cost and having better effect. E-learning has promoted student learning and improved the process of education training. It has appeared in following aspects: 5.1. Application of Various Learning Patterns With the development of computer technology, various

Impact of E-Learning in Education

Impact of COVID-19. In the COVID-19 era, e-learning has received a massive boost as the need of the hour is to give students the ability to study from anywhere and anytime. This is so that they can study in a safe environment away from the risk of exposure to the virus.

COVID-19 Impact on the E-Learning Industry - eLearning

Impact of E-Learning in Secondary Schools Students. The development of technology and the Internet all over the world during the last decade has enabled new educational delivery methods like E-learning.It is the use of technology to enable people to learn anytime and anywhere.E-learning applications and processes include Web-based learning, computer-based learning, virtual education opportunities and digital collaboration.

Impact of E-Learning in Secondary Schools Students ...

E-learning use is associated with increased students' academic performance. Recommendation was that, training and information sessions on e-learning need to focus primarily on how the e-learning technology can help improve the efficiency and effectiveness of students' learning process.

The impact of e-learning on students performance in ...

Impact of e-learning in further education: survey of scale and breadth viii achievement in a college was higher where lecturers used e-learning more frequently for preparation and research for teaching.

Impact of e-learning in further education: survey of scale ...

Impact of e-learning on learners There were also similarities between lecturers' use of e-learning and their perceptions of its impact on learners. The majority felt that e-learning had helped learners become more effective at creating visual presentations, presenting written work and researching topics.

Impact of e-learning in further education: survey of scale ...

Abstract The goal of this chapter is to analyze the impact of e-learning technologies and tools as a support for teacher-led courses in the performance (efficiency) of teaching as well as in the learner's acceptance. It also aims at analyzing and determining the moderating factors which have an influence on the process.

The Impact of E-Learning in University Education: An ...

This study focused on the impact of e-learning on academic performance. The study relates to a level one undergraduate module delivered using traditional lectures and e-learning based methods. E-learning has been revealed in this study not to have a positive impact on academic achievement contrary to the expectations of this study.

The Impact of e-Learning on Academic Performance - Project ...

The impacts of e-learning on educational ethics according to Khan (2005) are ensured. This is because the environments for e-learning are tolerant, so they are a good ways of offering equal access to the information world irrespective of the locations of the users, their ages as well as ethnic origins, and races (Khan, 2005).

The role of e-learning, the advantages and disadvantages ...

The positives of E-learning courses for distance learning students are far too many to be easily neglected. As cited in Singh, O'Donoghue, Worton (2005) E-Learning acts as an incentive for distance learning students as it provides them with a comfortable environment wherein learning takes place through group discussions, online activities and therefore, they spend more time preparing questions and responses.

Several arguments are associated with e-learning. Accessibility, affordability, flexibility, learning pedagogy, life-long learning, and policy are some of the arguments related to online pedagogy. It is said that online mode of learning is easily accessible and can even reach to rural and remote areas.

Online Learning: A Panacea in the Time of COVID-19 Crisis ...

E-learning has a significant role in instruction of students in higher education, so the objective of this study is investigating the strength of the relationship between e-learning and students' motivation among students participating in the research. This research was conducted in Tehran Alzahra University.

This book presents a collection of different researches and results on "e-learning". The chapters cover the deficiencies, requirements, advantages and disadvantages of e-learning and distance learning. So, the authors reported their research and analysis results on "e-learning" according to their areas of expertise.

Technologies develop rapidly and reach hurricane levels of velocity but quality E-Content and innovative applications lag behind. This book addresses the question how content industries change within a digital environment and what role information and communication technologies play in transforming the competitive landscape. The authors argue that post-industrial societies tend to pay substantial amounts for equipment and gadgets but invest far too little in the quality of the content. As a result, much effort is and has to be spent on the enhancement of E-Content. The contributions give an elaborate overview of: - the specifics, challenges and prospects of content in the network economy; - market developments of digital media services; - paid content business models; - impacts on scientific publishing; - developments in the field of E-Learning; - the interplay between technology and content with the example of interactive digital TV; - the mobile games market; - emerging new cross media markets; - the need to enhance the usability of websites and mobile applications; - how digital applications might be used to capture and store our personal experiences. A final chapter shows the prospects of the European E-Content market and gives an overview of valuable initiatives and resources dealing with the topic of E-Content.

"This book presents international practices in the development and use of applied e-Learning and e-Teaching in the classroom in order to enhance student experience, add value to teaching practices, and illuminate best practices in the area of e-Assessment. This book provides insight into e-Learning and e-Teaching practices while exploring the roles of academic staff in adoption and application"--Provided by publisher.

Includes bibliographical references and index.

Shows how and why different kinds of tertiary education institutions engage in e-learning.

This book explores three interwoven and challenging areas of research and development for future ICT-enabled applications: software intensive systems, complex systems and intelligent systems. Software intensive systems are systems that extensively interact with other systems, sensors, actuators, devices and users. More and more domains are now employing software intensive systems, e.g. the automotive sector, telecommunication systems, embedded systems in general, industrial automation systems and business applications. Moreover, the outcome of web services offers a new platform for enabling software intensive systems. Complex systems research is focused on the overall understanding of systems rather than their components. Complex systems are very much characterized by the changing environments in which they operate through their multiple internal and external interactions. They evolve and adapt through (internal and external) dynamic interactions. The development of intelligent systems and agents, which is increasingly characterized by the use of ontologies, can be beneficial for software intensive systems and complex systems alike. Accordingly, recent research in the areas of intelligent systems, robotics, neuroscience, artificial intelligence, and the cognitive sciences is essential to the future development of software intensive and complex systems.

The integration of technology in classrooms is rapidly emerging as a way to provide more educational opportunities for students. As virtual learning environments become more popular, evaluating the impact of this technology on student success is vital. Exploring the Effectiveness of Online Education in K-12 Environments combines empirical evidence and best practices in current K-12 distance learning and virtual schools. Emphasizing current research and opportunities, this book is an all-inclusive reference source for administrators, teachers, researchers, teacher educators, and policymakers interested in the development and implementation of blended and electronic learning in primary and secondary education.

This work includes articles addressing the social, cultural, organizational, and cognitive impacts of e-commerce technologies and advances on organizations around the world. It covers the impact of e-commerce on consumer behaviour, organizational behaviour, and development.

"This book provides a forum for researchers and practitioners to discuss the current and potential impact of online learning and training and to formulate methodologies for the creation of effective learning systems"--Provided by publisher.

This book has three sections on the role of technology in education. The first section covers the merits of online learning and environment. The second section of the book gives insight on new technologies in learning and teaching. The third section of the book underlines the importance of new tendencies for the technology in education. I have a firm belief that readers can find great insights on the role of technology in education from different reflections and research.
