"Instrumental Methods of Chemical Analysis" was one of only a few standard books on Instrumental Analysis in 1969. It is a good book and offers a good overview of the techniques that were in use at the time. Ewing's original expertise was, mostly, in the electroanalytical techniques.

Remember, that chemical/classical analytical methods (e.g. titration or gravimetry) rely on the stoichiometry of a chemical reaction so the measurement of the volume or mass of the reactants allow the direct calculation of the quantity of the analyte. The application of physical methods always requires a calibration.
