This book constitutes the proceedings of the 7th International Conference on Mobile Computing, Applications, and Services (MobiCASE 2015) held in Berlin, Germany, in November 2015. The 16 full and 4 poster papers were carefully reviewed and selected from 43 submissions, and are presented together with 4 papers from the First Workshop on Situation Recognition by Mining Temporal Information (SIREMETI 2015). The conference papers cover the following topics: intelligent caching, activity recognition and crowdsourcing, mobile frameworks, middleware, interactive applications and mobility.

Deep in the frozen heart of the arctic, the world's most feared monster has hidden away for centuries from the prying eyes of mankind. But now a desperate stranger has ventured to this timeless wasteland in search of the monster. Not to hunt or kill him like all other men before him. No, this man has come seeking the monster's help. In the darkened alleyways of Chicago, terrible experiments in bringing the dead back to life are again underway, filling the streets with soulless, undead wretches. And the only one who can stop the dark experiments is the creature who first crossed the threshold of death all those many years ago. A creature forged from the charnel house itself, brought to life through the burning pain of electricity. Stitched together from corpses coughed from their graves. With his new companion, the creature known as Frankenstein's Monster returns to the world of man. A world that hates and reviles him. To battle the horrifying results of his own

dark legacy.

The two-volume set LNCS 10777 and 10778 constitutes revised selected papers from the 12th International Conference on Parallel Processing and Applied Mathematics, PPAM 2017, held in Lublin, Poland, in September 2017. The 49 regular papers presented in this volume were selected from 98 submissions. For the workshops and special sessions, that were held as integral parts of the PPAM 2017 conference, a total of 51 papers was accepted from 75 submissions. The papers were organized in topical sections named as follows: Part I: numerical algorithms and parallel scientific computing; particle methods in simulations; task-based paradigm of parallel computing; GPU computing; parallel non-numerical algorithms; performance evaluation of parallel algorithms and applications; environments and frameworks for parallel/distributed/cloud computing; applications of parallel computing; soft computing with applications; and special session on parallel matrix factorizations. Part II: workshop on models, algorithms and methodologies for hybrid parallelism in new HPC systems; workshop power and energy aspects of computations (PEAC 2017); workshop on scheduling for parallel computing (SPC 2017); workshop on language-based parallel programming models (WLPP 2017); workshop on PGAS programming; minisymposium on HPC applications in physical sciences; minisymposium on high performance computing interval methods; workshop on complex collective systems.
