A remarkable collection of dark, funny and haunting short stories from the inimitable author of 'The Lottery'. An anxious devil, an elderly writer of poison pen letters and a mid-century Jack the Ripper; a pursuit though a nightmarish city, a small boy's thrilling train ride with a female thief, and a town where the possibility of evil lurks behind perfect rose bushes. This is the world of Shirley Jackson, by turns frightening, funny, strange and unforgettably revealed in this brilliant collection of short stories.

'Jackson at her best: plumbing the extraordinary from the depths of mid-twentieth-century common. [Just an Ordinary Day] is a gift to a new generation' - San Francisco Chronicle 'For Jackson devotees, as

Essentials of Stanford-Binet Intelligence Scales(SB5) Assessment provides comprehensive instructions on optimal use of the Stanford-Binet, including helpful step-by-step administration, scoring, and interpretation guidelines. Using the popular Essentials format, this handy resource also covers test strengths and weaknesses, reliability, and validity, and describes clinical applications of its use. Students in courses on psychological assessment and appraisal will find this to be an indispensable tool to understanding and utilizing this popular measure of intelligence.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY PUBLISHERS WEEKLY New York Times bestselling author Peter F. Hamilton's riveting new thriller combines the nail-biting suspense of a serial-killer investigation with clear-eyed scientific and social extrapolation to create a future that seems not merely plausible but inevitable. A century from now, thanks to a technology allowing instantaneous travel across light-years, humanity has solved its energy shortages, cleaned up the environment, and created far-flung colony worlds. The keys to this empire belong to the powerful North family—composed of successive generations of clones. Yet these clones are not identical.

For one thing, genetic errors have crept in with each generation. For another, the original three clone “brothers” have gone their separate ways, and the branches of the family are now friendly rivals more than allies. Or maybe not so friendly. At least that’s what the murder of a North clone in the English city of Newcastle suggests to Detective Sidney Hurst. Sid is a solid investigator who’d like nothing better than to hand off this hot potato of a case. The way he figures it, whether he solves the crime or not, he’ll make enough enemies to ruin his career. Yet Sid’s case is about to take an unexpected turn: because the circumstances of the murder bear an uncanny resemblance to a killing that took place years ago on the planet St. Libra, where a North clone and his entire household were slaughtered in cold blood. The convicted slayer, Angela Tramel, has always claimed her innocence. And now it seems she may have been right. Because only the St. Libra killer could have committed the Newcastle crime. Problem is, Angela also claims that the murderer was an alien monster. Now Sid must navigate through a Byzantine minefield of competing interests within the police department and the world’s political and economic elite . . . all the while hunting down a brutal killer poised to strike again. And on St. Libra, Angela, newly released from prison, joins a mission to hunt down the elusive alien, only to learn that the line

between hunter and hunted is a thin one.
