For big, bold and compelling, it is impossible to ignore Kissinger - 1923-1968: the idealist (Allen Lane), the first volume of Niall Ferguson's biography of Henry Kissinger, which asks us to reconsider America's best-known "realist" as more Kantian than Machiavellian, more Castlereagh than Meternich, at least up to 1968, when President Nixon first granted the Harvard academic high office.

Kissinger: 1923-1968: The Idealist. Niall Ferguson. ****Winner of the Council on Foreign Relations Arthur Ross Book Award. The definitive biography of Henry Kissinger, based on unprecedented access to his private papers****. No American statesman has been as revered or as reviled as Henry Kissinger.

Kissinger: 1923-1968: The Idealist | Niall Ferguson | download

The book attempts to show that Kissinger was much more idealistic when he was younger, although he became a solid political realist later in life. There is some truth in this, although very few Americans are completely pure realists, and Kissinger's Harvard dissertation certainly showed a solid understanding of the utility of realism.

From the bestselling author of *The Ascent of Money* and *The Square and the Tower*, the definitive biography of Henry Kissinger, based on unprecedented access to his private papers. Winner of the Council on Foreign Relations Arthur Ross Book Award No American statesman has been as revered or as reviled as Henry Kissinger. Once hailed as "Super K"--the "indispensable man" whose advice has been sought by every president from Kennedy to Obama--he has also been hounded by conspiracy theorists, scouring his every "telcon" for evidence of Machiavellian malfeasance. Yet as Niall Ferguson shows in this magisterial two-volume biography, drawing not only on Kissinger's hitherto closed private papers but also on documents from more than a hundred archives around the world, the idea of Kissinger as the ruthless arch-realist is based on a profound misunderstanding. The first half of Kissinger's life is usually skimmed over as a quintessential tale of American ascent: the Jewish refugee from Hitler's Germany who made it to the White House. But in this first of two volumes, Ferguson shows that what Kissinger achieved before his appointment as Richard Nixon's national security adviser was astonishing in its own right. Toiling as a teenager in a New York factory, he studied indefatigably at night. He was drafted into the U.S. infantry and saw action at the Battle of the Bulge--as well as the liberation of a concentration camp--but ended his army career interrogating Nazis. It was at Harvard that Kissinger found his vocation. Having immersed himself in the philosophy of Kant and the diplomacy of Metternich, he shot to celebrity by arguing for "limited nuclear war." Nelson Rockefeller hired him. Kennedy called him to Camelot. Yet Kissinger's rise was anything but irresistible. Dogged by press gaffes and disappointed by "Rocky," Kissinger seemed stuck--until a trip to Vietnam changed everything. *The Idealist* is the story of one of the most important strategic thinkers America has ever produced. It is also a political Bildungsroman, explaining how "Dr. Strangelove" ended up as consigliere to a politician he had always abhorred. Like Ferguson's classic two-volume history of the House of Rothschild, Kissinger sheds dazzling new light on an entire era. The essential account of an extraordinary life, it recasts the Cold War world.

"No American statesman has been as revered and as reviled as Henry Kissinger. Hailed by some as the "indispensable man", whose advice has been sought by every president from John F. Kennedy to George W. Bush, Kissinger has also attracted immense hostility from critics who have cast him as an amoral Machiavellian - the ultimate cold-blooded "realist". In this remarkable book, the first of two volumes, Niall Ferguson has created an extraordinary panorama of Kissinger's world, and a paradigm-shifting reappraisal of the man. Drawing not only on Kissinger's hitherto closed private papers but also on documents from more than a hundred archives around the world, this biography is Niall Ferguson's masterpiece. Like his classic two-volume history of the House of Rothschild, Kissinger sheds dazzling new light on an entire era."

A definitive portrait of the American statesman, based on unprecedented access to his private papers, challenges common misconceptions to trace Kissinger's beliefs to philosophical idealism.

From the bestselling author of *The Ascent of Money* and *The Square and the Tower*, the definitive biography of Henry Kissinger, based on unprecedented access to his private papers. Winner of the Council on Foreign Relations Arthur Ross Book Award No American statesman has been as revered or as reviled as Henry Kissinger. Once hailed as “ Super K ” —the “ indispensable man ” whose advice has been sought by every president from Kennedy to Obama—he has also been hounded by conspiracy theorists, scouring his every “ telcon ” for evidence of Machiavellian malfeasance. Yet as Niall Ferguson shows in this magisterial two-volume biography, drawing not only on Kissinger ’ s hitherto closed private papers but also on documents from more than a hundred archives around the world, the idea of Kissinger as the ruthless arch-realist is based on a profound misunderstanding. The first half of Kissinger ’ s life is usually skimmed over as a quintessential tale of American ascent: the Jewish refugee from Hitler ’ s Germany who made it to the White House. The essential account of an extraordinary life, it recasts the Cold War world.

SPECTATOR, NEW STATESMAN, TELEGRAPH, SUNDAY TIMES and FINANCIAL TIMES BOOKS OF THE YEAR 2015 No American statesman has been as revered and as reviled as Henry Kissinger. Hailed by some as the "indispensable man", whose advice has been sought by every president from John F. Kennedy to George W. Bush, Kissinger has also attracted immense hostility from critics who have cast him as an amoral Machiavellian - the ultimate cold-blooded "realist". In this remarkable new book, the first of two volumes, Niall Ferguson has created an extraordinary panorama of Kissinger's world, and a paradigm-shifting reappraisal of the man. Only through knowledge of Kissinger's early life (as a Jew in Hitler's Germany, a poor immigrant in New York, a GI at the Battle of the Bulge, an interrogator of Nazis, and a student of history at Harvard) can we understand his debt to the philosophy of idealism. And only by tracing his rise, fall and revival as an adviser to Kennedy, Nelson Rockefeller and, finally, Richard Nixon can we appreciate the magnitude of his contribution to the theory of diplomacy, grand strategy and nuclear deterrence. Drawing not only on Kissinger's hitherto closed private papers but also on documents from more than a hundred archives around the world, this biography is Niall Ferguson's masterpiece. Like his classic two-volume history of the House of Rothschild, Kissinger sheds dazzling new light on an entire era.

A new account of America's most controversial diplomat that moves beyond praise or condemnation to reveal Kissinger as the architect of America's current imperial stance In his fascinating new book *Kissinger's Shadow*, acclaimed historian Greg Grandin argues that to understand the crisis of contemporary America—its never-ending wars abroad and political polarization at home—we have to understand Henry Kissinger. Examining Kissinger's own writings, as well as a wealth of newly declassified documents, Grandin reveals how Richard Nixon's top foreign policy advisor, even as he was presiding over defeat in Vietnam and a disastrous, secret, and illegal war in Cambodia, was helping to revive a militarized version of American exceptionalism centered on an imperial presidency. Believing that reality could be bent to his will, insisting that intuition is more important in determining policy than hard facts, and vowing that past mistakes should never hinder future bold action, Kissinger anticipated, even enabled, the ascendance of the neoconservative idealists who took America into crippling wars in Afghanistan and Iraq. Going beyond accounts focusing either on Kissinger's crimes or accomplishments, Grandin offers a compelling new interpretation of the diplomat's continuing influence on how the United States views its role in the world.

The New York Times Bestseller A shocking and riveting look at one of the most dramatic and disastrous presidencies in US history, from Pulitzer Prize and National Book Award winner Tim Weiner Based largely on documents declassified only in the last few years, *One Man Against the World* paints a devastating portrait of a tortured yet brilliant man who led the country largely according to a deep-seated insecurity and distrust of not only his cabinet and congress, but the American population at large. In riveting, tick-tock prose, Weiner illuminates how the Vietnam War and the Watergate controversy that brought about Nixon's demise were inextricably linked. From the hail of garbage and curses that awaited Nixon upon his arrival at the White House, when he became the president of a nation as deeply divided as it had been since the end of the Civil War, to the unprecedented action Nixon took against American citizens, who he considered as traitorous as the army of North Vietnam, to the infamous break-in and the tapes that bear remarkable record of the most intimate and damning conversations between the president and his confidantes, Weiner narrates the history of Nixon's anguished presidency in fascinating and fresh detail. A crucial new look at the greatest political suicide in history, *One Man Against the World* leaves us not only with new insight into this tumultuous period, but also into the motivations and demons of an American president who saw enemies everywhere, and, thinking the world was against him, undermined the foundations of the country he had hoped to lead.

From the bestselling author of *The Ascent of Money* and *The Square and the Tower* Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or "killer applications"—competition, science, the rule of law, modern medicine, consumerism, and the work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The West and the Rest* recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

Kissinger's invaluable and lasting contribution to the history of this crucial time. One of the most important books to come out of the Nixon Administration, the New York Times bestselling *White House Years* covers Henry Kissinger's first four years (1969 – 1973) as Assistant to the President for National Security Affairs. Among the momentous events recounted in this first volume of Kissinger's timeless memoirs are his secret negotiations with the North Vietnamese in Paris to end the Vietnam War, the Jordan crisis of 1970, the India-Pakistan war of 1971, his back-channel and face-to-face negotiations with Soviet leaders to limit the nuclear arms race, his secret journey to China, and the historic summit meetings in Moscow and Beijing in 1972. He covers major controversies of the period, including events in Laos and Cambodia, his "peace is at hand" press conference and the breakdown of talks with the North Vietnamese that led to the Christmas bombing in 1972. Throughout, Kissinger presents candid portraits of world leaders, including Richard Nixon, Anwar Sadat, Golda Meir, Jordan's King Hussein, Leonid Brezhnev, Chairman Mao and Chou En-lai, Willy Brandt, Charles de Gaulle, and many others. *White House Years* is Henry Kissinger's invaluable and lasting contribution to the history of this crucial time.

By the time Henry Kissinger was made secretary of state in 1973, he had become, according to the Gallup Poll, the most admired person in America and one of the most unlikely celebrities ever to capture the world's imagination. Yet Kissinger was also reviled by large segments of the American public, ranging from liberal intellectuals to conservative activists. Kissinger explores the relationship between this complex man's personality and the foreign policy he pursued. Drawing on extensive interviews with Kissinger as well as 150 other sources, including U.S. presidents and his business clients, this first full-length biography makes use of many of Kissinger's private papers and classified memos to tell his uniquely American story. The result is an intimate narrative, filled with surprising revelations, that takes this grandly colorful statesman from his childhood as a persecuted Jew in Nazi Germany, through his tortured relationship with Richard Nixon, to his later years as a globe-trotting business consultant.
