The PSA test may give false-positive or false-negative results. A false-positive test result occurs when a man's PSA level is elevated but no cancer is actually present. A false-positive test result may create anxiety for a man and his family and lead to additional medical procedures, such as a prostate biopsy, that can be harmful. Possible ...

The Kruskal-Wallis test by ranks, Kruskal-Wallis H test, or one-way ANOVA on ranks is a non-parametric method for testing whether samples originate from the same distribution. It is used for comparing two or more independent samples of equal or different sample sizes. It extends the Mann-Whitney U test, which is used for comparing only two groups. The parametric equivalent of the Kruskal-Wallis test is the one-way analysis of variance. A significant Kruskal-Wallis test indicates ...
