Sir Basil Henry Liddell Hart, commonly known throughout most of his career as Captain B. H. Liddell Hart, was a British soldier, military historian and military theorist. In the 1920s and later he wrote a series of military histories that proved influential among strategists. He argued that frontal assault was a strategy that was bound to fail at great cost in lives, as happened in the First World War. He instead recommended the "indirect approach" and reliance on fast-moving armoured formations

History of the Second World War, B. H. Liddell Hart's last work as well as his magnum opus, embodies the fruits of twenty years of research and a lifetime of thinking on war. It abounds with controversial judgments, including provocative assertions about the true causes behind France's defeat in 1940, Hitler's failed invasion of Russia, and Japan's stunning victory at Pearl Harbor; the effectiveness of the Allies' strategic bombing of Germany; the questionable necessity of detonating atom bombs over Hiroshima and Nagasaki; and much more. This monumental history is both a crowning achievement and a final summation by one of the greatest military thinkers of the twentieth century.

This troubling book offers a striking illustration of how history can be used and abused--how a gifted individual can create their own self-serving version of the past.

"The most important book by one of the outstanding military authorities of our time." ? Library Journal This is the classic book on war as we know it. During his long life, Basil H. Liddell Hart was considered one of the world's foremost military thinkers--a man generally regarded as the "Clausewitz of the 20th century." *Strategy* is a seminal work of military history and theory, a perfect companion to Sun-tzu's *The Art of War* and Carl von Clausewitz's *On War*. Liddell Hart stressed movement, flexibility, and surprise. He saw that in most military campaigns dislocation of the enemy's psychological and physical balance is prelude to victory. This dislocation results from a strategic indirect approach. Reflect for a moment on the results of direct confrontation (trench war in WW I) versus indirect dislocation (Blitzkrieg in WW II). Liddell Hart is also tonic for business and political planning: just change the vocabulary and his concepts fit.

Sir Basil Henry Liddell Hart (1895-1970) was an English soldier, military historian, and leading inter-war theorist. 1930's *The Real War* was republished as *A History of the World War (1914-1918)*.

When Liddell Hart's *Sherman* was first published in 1929, it received encomiums such as these: "A masterly performance . . . one of the most thoroughly dignified, one of the most distinguished biographies of the year."--Henry Steele Commager, *New York Herald Tribune* "It is not often that one comes upon a biography that is so well done as this book. Nearly every page bears evidence of the fact that it is the product of painstaking and exhaustive research, mature thought, and an expert understanding of the subject in hand . . ."--*Saturday Review of Literature*

Great Captains Unveiled incisively examines the brilliant military careers and intriguing personalities of six masters of the battlefield: Jenghiz Khan (1167?–1227) and Sabutai (1172?–1245), who led their Mongol cavalry into the heart of medieval Europe and shook the fabric of its civilization; the French Marechal de Saxe (1696-1750), one of the greatest generals of his age, a military prophet of rare foresight, and author of *Reveries*, a classic on the art of war; Gustavus Adolphus (1594–1632), the Swedish king during the Thirty Years War and the founder of the modern army, who emphasized officer education, national recruitment, and the combination of firepower and mobility; Wallenstein (1583–1634), champion of the Holy Roman Empire and Adolphus's formidable opponent, who proved to be a genius of maneuver and psychological warfare; and James Wolfe (1727–1759), whose flawless execution of one of the most daring amphibious operations in history virtually gave Canada to the British. Liddell Hart's penetrating, decisive studies of these great captains reveal not only their genius and impact, but offer relevant lessons that 20th-century military commanders have yet to fully reap.

The German Generals who survived Hitler's Reich talk over World War II with Capt. Liddell Hart, noted British military strategist and writer. They speak as professional soldiers to a man they know and respect. For the first time, answers are revealed to many questions raised during the war. Was Hitler the genius of strategy he seemed to be at first? Why did his Generals never overthrow him? Why did Hitler allow the Dunkirk evacuation? Current interest, of course, focuses on the German Generals' opinion of the Red Army as a fighting force. What did the Russians look like from the German side? How did we look? And what are the advantages and disadvantages under which dictator-controlled armies fight? In vivid, non-technical language, Capt. Liddell Hart reports these interviews and evaluates the vital military lessons of World War II.

In the PAN GRAND STRATEGY series, this is an account of Germany's generals, including their own version of the military events of 1939-1945 and details of their rise and fall, presenting a picture of the Second World War as it was seen by the men who commanded the panzer divisions and the might of the Wehrmacht.
