This seminal work focuses on human development from middle childhood to middle adulthood, through analysis of the research findings of the groundbreaking Jyvaskylä Longitudinal Study of Personality and Social Development (JYLS). The JYLS project, which began in 1968, has generated extensive publications over many years but this is the first comprehensive summary that presents the conceptual framework, the research design and methodology, and the findings. The study looks at the development over time of issues related to personality, identity, health, anti-social behavior, and well-being and is unparalleled in its duration, intensity, comprehensiveness and psychological richness. The thorough synthesis of this study illustrates that there are different paths to adulthood and that human development cannot be described in average terms. The 42-year perspective that the JYLS provides shows the developmental consequences of children's differences in socioemotional behavior over time, and the great significance of children's positive socioemotional behavior for their further development until middle age. Not only will the book be an invaluable tool for those considering research methods and analysis on large datasets, it is ideal reading for students on lifespan courses and researchers methodologically interested in longitudinal research.

Over much of its rule, the regime of Hafez al-Asad and his successor Bashar al-Asad deployed violence on a massive scale to maintain its grip on political power. In this book, Salwa Ismail examines the rationalities and mechanisms of governing through violence. In a detailed and compelling account, Ismail shows how the political prison and the massacre, in particular, developed as apparatuses of government, shaping Syrians' political subjectivities, defining their understanding of the terms of rule and structuring their relations and interactions with the regime and with one another. Examining ordinary citizens' everyday life experiences and memories of violence across diverse sites, from the internment camp and the massacre to the family and school, The Rule of Violence demonstrates how practices of violence, both in their routine and spectacular forms, fashioned Syrians' affective life, inciting in them feelings of humiliation and abjection, and infusing their lived environment with dread and horror. This form of rule is revealed to be constraining of citizens' political engagement, while also demanding of their action.
