Lights, Camera, Commander: Drana, the Last Bloodchief. By Eric Levine / September 17, 2020 September 17, 2020. One of the best (and worst) parts of writing a set review is asking yourself "what next?!" I have so many ideas flying around after writing that enormous article, and not one of them has been able to out-muscle the rest of them and ...

Lights, Camera, Commander: Drana, the Last Bloodchief ...
Camera Video Lights. Lighting a subject for video photography can be done in one of two ways, either with an on-camera light which is popular with reporters, or a three-point lighting system with a backlight, key light and fill light. Lighting is used to light a subject for the camera and illuminate a subject should there be insufficient natural light.

How traffic light cameras work. Traffic light (or "red light") cameras detect vehicles which pass through lights after they've turned red by using sensors or ground loops in the road. When traffic lights are on red, the system becomes active and the camera is ready to photograph any car that passes over the trigger.

Amigas is officially open for business! When the group is asked to take part in a reality show featuring quinceanera parties, they all jump at the chance. But being under the spotlight brings out the true colors of the group and before anyone can even cry "action!", Alicia is fighting with Gaz, Carmen is worrying about her vows, and Jamie is feeling left out. With the cameras rolling, will Carmen's party go up in flames?

For her tenth birthday, Rebecca is invited to visit her cousin Max's movie studio! When the cameras begin to roll, she finds herself unexpectedly presented with a part to play. Rebecca doesn't have the courage to tell her family, but is it wrong to keep such a big secret? Later that summer, on a visit to the factory where her uncle and cousin work, Rebecca is horrified. Is this the life that's in store for cousin Ana? There must be a way to improve conditions at the factory, and Rebecca is determined to do her part - even if it means marching straight into danger.

Lights, Camera, Fastball is a fascinating look at the Hollywood Stars, a glamour-shrouded baseball team with a star-studded fan base during the Golden Age of Hollywood. Throughout their glorious twenty-year run in the Pacific Coast League, the Stars were an inventive team whose innovations are still seen in professional baseball today.

Political scientists investigate the impact that political advertisements have on political campaigns and elections. They use case studies, interviews, and analysis of specific campaigns and ads--mostly in the US but also in Canada--to explain how ads are constructed, why some work and some fail, and the factors about political ads that allow them

Lights! Camera! Action and the brain: The Use of Film in Education is about an innovative pedagogy whereby performing arts and digital production play a key role in teaching and learning. The book combines theory and practice; as such, it lays solid neurological foundations for film and media literacy, and provides several relevant practical applications from worldwide scholars. The book contains thirteen chapters three of which address a number of theoretical issues related to the camera and the brain while the remaining ten are practical illustrations of the extent to which film and video are used as pedagogical tools. In the book preface, Nikos Theodosakis, author of "The Director in the Classroom", writes that the book contributors "have built a wonderful bridge for us to travel over". In fact, the book chapters transcend age restrictions to include diverse age groups, children and young adults. The topics range from learning language and philosophy to learning about one's self, one's environment, and one's cultural identity. Much more importantly, the book addresses the needs of regular and special needs learners. Arts in general, and films in particular, are shown to display salient and dynamic roles in appealing to a wide variety of regular and special needs learners. In short, the book is highly beneficial to educators and to education managers; it "will have the power to change teaching and the way the curriculum is perceived" for several generations to come.

This important volume addresses a number of central topics concerning how history is depicted in film. In the preface, the volume editors emphasize the importance of using film in teaching history: students will see historical films, and if they are not taught critical viewing, they will be inclined simply to accept what they see as fact. Authors of the individual chapters then explore the portrayal of history—and the uses of history—in specific films and film genres. Robert Rosenstone's "In Praise of the Biopic" considers such films as Reds, They Died with Their Boots On, Little Big Man, Seabiscuit, Cinderella Man, and The Grapes of Wrath. In his chapter, Geoff Pingree focuses on the big questions posed in Jay Rosenblatt's 1998 film Human Remains. Richard Francaviglia's chapter on films about the Middle East is especially timely in the post-9/11 world. One chapter, by Daniel A. Nathan, Peter Berg, and Erin Klemyk, is devoted to a single film: Martin Scorsese's urban history The Gangs of New York, which the authors see as a way of exploring complex themes of the immigrant experience. Finally, Robert Brent Toplin addresses the paradox of using an art form (film) to present history. Among other themes, he considers the impact of Patton and Platoon on military decisions and interpretations, and of Birth of a Nation and Glory on race relations. The cumulative effect is to increase the reader's understanding of the medium of film in portraying history and to stimulate the imagination as to how it can and how it should not be used. Students and teachers of history and cinema will benefit deeply from this informative and thoughtful discussion.

A unique and entertaining memoir of training and working with animal actors. Lights, Camera, Lions tells the remarkable story of Hungarian Hubert Geza Wells, who defects to America during the communist era and goes on to make a name for himself as one of the most sought-after animal trainers in Hollywood. With tales from his long career, which included filming on five continents and working on over a hundred films including Out of Africa and Born Free, his hair-raising memoir (pun intended) also provides insight into training animals that has never been revealed before.

Lights, Camera, Execution!: Cinematic Portrayals of Capital Punishment fills a prominent void in the existing film studies and death penalty literature. Each chapter focuses on a particular cinematic portrayal of the death penalty in the United States. Some of the analyzed films are well-known Hollywood blockbusters, such as Dead Man Walking (1995); others are more obscure, such as the made-for-television movie Murder in Coweta County (1983). By contrasting different portrayals where appropriate and identifying themes common to many of the studied films "such as the concept of dignity and the role of race (and racial discrimination)" the volume strengthens the reader's ability to engage in comparative analysis of topics, stories, and cinematic techniques.Written by three professors with extensive experience teaching, and writing about the death penalty, film studies, and criminal justice, Lights, Camera, Execution! is deliberately designed for both classroom use and general readership.

Fills a long felt need of a modern text based on CCIR system, B standards. Comprehensively covers almost every aspect of TV engineering including TV studio equipment organization & control, TV transmitters, relay links, satellite TV, propagation, antenna systems, TV receivers, TV IC's & CCTV systems. Discusses in detail latest hybrid & solid state receiver circuits & includes modern innovations like TV games, remote control etc. Gives functional requirements & design considerations of the various systems & circuits, discussing first the basic circuits followed by description of typical practical circuits.
