longitudinal waves, or waves in which particles move back and forth in the same direction as the wave. You can use the Longitudinal Waves Gizmo™ to explore the behavior of sound waves. In the Gizmo, an air-filled tube contains 24 evenly-spaced, airtight dividers.

Longitudinal

Longitudinal Waves

(ANSWER KEY)

A source vibrates up and down and back and forth, causing air molecules to move in a circular motion as the wave is D. A source ejects a ring of high-velocity air molecules that travel from the source to a listener.

Explanation: A sound wave is an example of a
