lays out the facts and assesses the options-global and personal-for dealing with the threat of a warming world. The guide looks at the evolution of our atmosphere over the last 4.5 billion years and what computer simulations of climate change reveal about our past, present and future. This updated edition includes scientific findings that have emerged since the 2007 report from the Intergovernmental Panel on Climate Change (IPCC), as well as background on recent controversies and an updated politics section that reflects post-Copenhagen developments. Discover how rising temperatures and sea levels, plus changes to extreme weather patterns, are already affecting life around the

world. The Rough Guide to Climate Change unravels how governments, scientists and engineers plan to tackle the problem and includes information on what you can do to help.

Argentinean philosopher, theologian, and historian Enrique Dussel understands the present international order as divided into the "culture of the center" -- by which he means the ruling elite of Europe, North America, and Russia -- and "the peoples of the periphery" -- by which he means the populations of Latin America, Africa, and part of Asia, and the oppressed classes (including women and children) throughout the world. In 'Philosophy of Liberation,' he presents a

profound analysis of the alienation of peripheral peoples resulting from the imperialism of the center for more than five centuries. Dussel's aim is to demonstrate that the center's historic cultural, military, and economic domination of poor countries is 'philosophically' founded on North Atlantic ontology. By expressing supposedly universal knowledge, European philosophies, argues Dussel, have served to equate the cultural standards, modes of behavior, and rationalistic orientation of the West with human nature and to condemn the unique characteristics of peripheral peoples as "nonbeing, nothing, chaos, irrationality." Hence, Western philosophies

have historically legitimated and hidden the domination that oppressed cultures have suffered at the hands of the center. Dussel probes multinational corporations, the communications media, and the armies of the center with their counterparts among the Third World elite. The creation of a just world order in the future, according to Dussel, hinges on the liberation of the periphery, based on a philosophy that is able to "think the world" from the perspective of the poor and to reclaim the Third World's distinct cultural inheritance, which is imbedded in the popular cultures of the poor. Apart from the liberation of the periphery, there will be no future: "the center will feed itself on the

sameness it has ingrained within itself. The death of the child, of the poor, will be its own death." This is a disquieting but stimulating book for scholars and advanced students of philosophy, ethics, liberation theology, and global politics.

Davie Jones—an ugly duckling growing up in small-town Mississippi with a mother who couldn't get any meaner—is positive her life couldn't be any worse. Just when she's resigned herself to her fate, she sees a movie that will change her life—Sixteen Candles. But in her case, life doesn't imitate art. Tormented in school and hopelessly in unrequited love with a handsome football player, Davie

finds it bittersweet to dream of Molly Ringwald endings. When a cruel school prank goes too far, Davie leaves the life she knows and reinvents herself in the glittery world of Hollywood—as a beautiful and successful lounge singer. Just as she's about to ride off into the L.A. sunset, the past comes back with a vengeance, threatening to crush Davie's dreams—and break her heart again. With wholly original characters and a cinematic storyline, *32 Candles* introduces Ernessa T. Carter, a new voice in fiction with smarts, attitude, and sassiness to spare.
