The authoritative guide for dietetic students and both new and experienced dietitians -- endorsed by the British Dietetic Association Now in its sixth edition, the bestselling Manual of Dietetic Practice has been thoroughly revised and updated to include the most recent developments and research on the topic. Published on behalf of the British Dietetic Association, this comprehensive resource covers the entire dietetics curriculum, and is an ideal reference text for healthcare professionals to develop their expertise and specialist skills in the realm of dietetic practice. This important guide includes: The latest developments and scientific evidence in the field New data on nutrition and health surveillance programs Revised and updated evidence-based guidelines for dietetic practice An exploration of how Public Health England has influenced the field Practical advice on public health interventions and monitoring A companion website with helpful materials to support and develop learning Written for dietitians, clinical nutritionists, and other healthcare professionals by leading dietitians and other professionals, the Manual of Dietetic Practice continues to provide a crucial resource for experts and novices alike.

The standard work for all those involved in the field of clinical nutrition and dietetics, The Manual of Dietetic Practice has been equipping health care professionals with the essential foundations on which to build expertise and specialist skill since it was first published in 1988. The fourth edition responds to the changing demand for multidisciplinary, patient-centred, evidence-based practice and has been expanded to include dedicated chapters covering adult nutrition, freelance dietetics, complementary and alternative therapies. Compiled from the knowledge of both individual experts and the British Dietetic Association's Specialist Groups, this truly is the essential guide to the principles of dietetics across its whole range.

The ideal companion resource to ' Manual of Dietetic Practice ', this book takes a problem-based learning approach to dietetics and nutrition with cases written and peer reviewed by registered dietitians, drawing on their own experiences and specialist knowledge Each case study follows the Process for Nutrition and Dietetic Practice published by the British Dietetic Association in 2012 Includes case studies in public health, an increasingly important area of practice

Clinical Paediatric Dietetics, Fifth Edition continues to provide a very practical approach to dietary management of children with an extensive range of disorders. Thoroughly revised to reflect the most recent scientific and medical literature, this new edition proves to be an indispensable guide for both acute and community-based healthcare professionals. New and expanded content covering a range of disorders, treatments and guidelines has been introduced to the fifth edition, from diabetes technology and the ketogenic diet, to renal tubular disorders, refeeding syndrome, and blended diets in enteral nutrition. This authoritative volume: Supports contemporary evidence-based clinical practice Covers inherited metabolic disorders and diseases of all major organ systems Provides contributions from practising paediatric dietitians, academic research dietitians and a paediatric psychiatrist Includes worked examples, real-world case studies and easy-to-use tables Produced in collaboration with the British Dietetic Association (BDA) and the BDA Paediatric Specialist Group. Clinical Paediatric Dietetics is an invaluable resource for all healthcare practitioners caring for children.

Now in its fifth edition, Care of People with Diabetes is a comprehensive clinical manual for nurses, healthcare professionals and students alike, providing an extensive summary of the most up-to-date knowledge in a rapidly developing field, as well as the role of education and self-care in achieving desirable outcomes. Covering both the theory and evidence-based practice of diabetes care, this authoritative volume integrates traditional thinking and innovative concepts to challenge readers to ' think outside the box ' when rendering care. New and updated content on the pathophysiology of diabetes and the implications for management, how to apply guideline recommendations in practice, and contemporary evidence for best practice diabetes care Highlights personalised care and shared, evidence-based decision-making, emphasising the need for effective communication to reduce judgmental language and the negative effect it has on wellbeing and outcomes Written by internationally recognised experts in diabetes care, research and education Includes a range of learning features, such as practice questions, key learning points, diagrams, and further reading suggestions Care of People with Diabetes is an essential companion to clinical practice for both trainee and experienced nurses and healthcare professionals, particularly those in acute care settings, and students undertaking diabetes courses or preparing for qualification exams.

Completely revised with new chapters and sections covering everything the health-care provider needs to know when working with the older adult either at home or in nursing and long-term care facilities. Chapters cover factors affecting nutrition, nutrition and disease, nutritional assessment, dining challenges and regulatory compliance. This scientifically sound and practical resource for new and experienced nutrition professionals includes new forms, resources, the food guide pyramid for older adults and an index of tales.

Now updated, this quick-reference provides practical, evidence-based recommendations for nutrition of healthy individuals, nutritional support of hospitalized patients, and dietary management of patients with diabetes, renal disease, cancer, and AIDS.
