The Americans focuses on nine themes: Diversity and the national identity; America in world affairs; Economic opportunity; Science and technology; Women and political power; Immigration and migration; States' rights; Voting rights; Civil rights. - p. [xxviii].

Criticizes the way history is presented in current textbooks, and suggests a more accurate approach to teaching American history.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

In the summer of 1932, General Douglas MacArthur led regular United States Army troops into the streets of Washington, D.C. to evict more than ten thousand veterans of the Great War from the streets of Washington. This is the story of those veterans, told by one of their number. Walter W. Waters, a World War I Army sergeant, set out from Portland, Oregon with 300 other veterans in 1932 to petition Congress for early payment of the bonus promised to veterans of the World War. With the Great Depression at its height, these men crossed the country on freight trains, then lived in shacks and abandoned buildings in Washington while seeking to improve their circumstances. This is their story, told by one of their own.
