Getting Started with Mean, Median, Mode and Range Problems. The worksheets on this page require kids to calculate the mean, median, range and mode for small sets of numbers, all of which are easy enough to add up on paper without the aid of a calculator. These are great practice tools for introducing concepts like mean or median because the sets of numbers are small enough to focus on the techniques to compute these statistics without getting bogged down in the calculations themselves.

Math Worksheets for Mean, Median, Mode and Range

So what we do is we take the mean of these two numbers and we pick that as the median. So if you take 23 plus 25 divided by 2, that's 48 over 2, which is equal to 24. So even though 24 isn't one of these numbers, the median is 24.
