(MBPM) is a tactical-level, visual mapping approach that enables improvement teams to make effective, data-based decisions regarding waste elimination and measure ongoing process performance. The mapping technique, often used to drill down from a value stream map, integrates the functional orientation of traditional swim-lane process maps with time and quality metrics that are essential for designing improved processes.

Metrics-Based Process Mapping: Identifying and Eliminating ... VSM pairs particularly well with Metrics-Based Process Mapping (MBPM) practice. Used together, VSM represents flow of value through a system at a macro level and MBPM represents lower-level implementation steps and processes. Look at Value Stream Mapping
