Monotonic cubic spline interpolation.

Abstract: This paper describes the use of cubic splines for interpolating monotonic data sets. Interpolating cubic splines are popular for fitting data because they use low-order polynomials and have C^2 continuity, a property that permits them to

Access Free Monotonic Cubic Spline Interpolation

~~Monotone cubic Hermite interpolation~~

This function computes a cubic spline or sub-spline s which interpolates the (x_i, y_i) points, ie, we have $s(x_i) = y_i$ for all $i = 1, \dots, n$. The resulting spline s is completely defined by the triplet (x, y, d) where d is the vector with the derivatives at the x_i : $s'(x_i) = d_i$ (this is called the Hermite form).

Access Free Monotonic Cubic Spline Interpolation

The evaluation of the spline at some points must be done by the interp function.
