Building on the strengths of the fourth edition, Basic Nursing: Essentials for Practice is back in a new edition! Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional roles, and management, maintains the text's focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter's case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning.

Rev. ed. of: Foundations of psychiatric mental health nursing / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010.

Essential for NCLEX, course and competency review, this resource is a complete, concentrated outline of nursing fundamentals. Each chapter contains objectives, pre- and post chapter tests with comprehensive rationales, vocabulary review, practice to pass exercises, critical thinking case studies, as well as NCLEX alerts and new test-taking strategies. Content includes all of the "need-to-know" facts covering the nursing process, physical assessment, communication, professional standards, health promotion through the lifespan, and more.

Designed to teach nurses about the development, motivational, and sociocultural differences that affect teaching and learning, this text combines theoretical and pragmatic content in a balanced, complete style. --from publisher description.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

This innovative book prepares students for the NCLEX-PN exam with thorough content review and 3,000 practice questions. Silvestri provides readers with information on NCLEX-PN preparation, test-taking strategies and the NCLEX-PN from students' perspectives. A free CD-ROM contains all 1,600 questions from the book plus 1,400 additional questions.

The World Health Organization has developed these Nurse Educator Core Competencies to enable educators to effectively contribute to the attainment of high quality education, and the production of effective, efficient and skilled nurses who are able to respond to the health needs of the populations they serve. This will enable the attainment of objectives one and two of the Global strategy on human resources for health: Workforce 2030 and is also a priority in the updated Global strategic directions on nursing and midwifery 2016-2020. The aim of this publication is to provide a clear outline of Nurse Educator Core Competencies and performance expectations, which can form the basis for developing a competence-based curriculum encompassing the cognitive, affective and psychomotor skills and behaviors expected of nurse teachers. The competencies are intended to help guide the educational preparation of nurse teachers; ensure educational quality and accountability; and, ultimately, contribute to improving the provision of nursing care and outcomes of health services. Much effort has gone into the preparation of the Nurse Educator Core Competencies. It is the aim of the World Health Organization that they will facilitate nurse educators to attain increased proficiency in assisting student nurses to acquire all the knowledge, skills and attitudes necessary to practice nursing effectively in the 21st century.
