This anthology of stories, poems, essays and quotations explores the duality of being both a woman and a physician.

Our personalities and our identities are intimately bound up with the stories that we tell to organize and to make sense of our lives. To understand the human meaning of illness, we therefore must turn to the stories we tell about illness, suffering, and medical care. *Stories of Sickness* explores the

many dimensions of what illness means to the sufferers and to those around them, drawing on depictions of illness in great works of literature and in nonfiction accounts. The exploration is primarily philosophical but incorporates approaches from literature and from the medical social sciences. When it was first published in 1987, *Stories of Sickness* helped to inaugurate a renewed interest in the importance of narrative studies in health care. For the Second Edition the text has been thoroughly revised and significantly expanded. Four almost entirely new chapters have been added on the nature, complexities, and rigor of narrative ethics and how it is carried out. There is also an additional chapter on maladaptive ways of being sick that deals in greater depth with disability issues. Health care professionals,

students of medicine and bioethics, and ordinary people coping with illness, no less than scholars in the health care humanities and social sciences, will find much value in this volume. Unique Features: \*Philosophically sophisticated yet clearly written and easily accessible \*Interdisciplinary approach--combines philosophy, literature, health care, social sciences \*Contains many fascinating stories and vignettes of illness drawn from both fiction and nonfiction \*A new and comprehensive overview of the "hot topic" of narrative ethics in medicine and health care

Gathers poems, a selection from the author's autobiography, and a dozen stories about doctors, patients, errors in judgement, and breakthroughs

Best known as one of the great short story writers of the twentieth century, Raymond Carver also published several volumes of poetry and considered himself as much a poet as a fiction writer. Sandra Lee Kleppe combines comparative analysis with an in-depth examination of Carver’s poems, making a case for the quality of Carver’s poetic output and

showing the central role Carver's pursuit of poetry played in his career as a writer. Carver constructed his own organic literary system of 'autopoetics,' a concept connected to a paradigm shift in our understanding of the inter-relatedness of biological and cultural systems. This idea is seen as informing Carver's entire production, and a distinguishing feature of Kleppe's book is its contextualization of Carver's poetry within the complex literary and scientific systems that influenced his development as a writer. Kleppe addresses the common themes and intertextual links between Carver's poetry and short story careers, situates Carver's poetry within the love poem tradition, explores the connections between neurology and poetic memories, and examines Carver's use of the elegy genre within the context of his

terminal illness. Tellingly, Carver's poetry, which has aroused slight interest among literary scholars, is frequently taught to medical students. This testimony to the interdisciplinary implications of Carver's work suggests the appropriateness of Kleppe's culminating discussion of Carver's work as a bridge between the fields of literature and medicine.

This arrestingly novel work develops a normative synthesis of medical humanities, virtue ethics, medical ethics, health law and human rights. It presents an ambitious, complex and coherent argument for the reconceptualisation of the doctor-patient relationship and its regulation utilising approaches often thought of as being separate, if not opposed (virtue-based ethics and universal human rights). The case is argued

gracefully, with moderation, but also with respect for opposing positions. The book's analysis of the foundational professional virtue of therapeutic loyalty is an original departure from the traditional discourse of "patient autonomy," and the ethical and legal "duties" of the medical practitioner. The central argument is not merely presented, as bookends, in the introduction and conclusion. It is cogently represented in each chapter and section and measured against the material considered. A remarkable feature is the use of aptly selected "canonical" literature to inform the argument. These references run from Hesse's "The Glass Bead Game" in the abstract, to Joyce's "Ulysses" in the conclusion. They include excerpts from and discussion about Bergman, Borges, Boswell, Tolstoy, de Beauvoir, Chekhov,

Dostoevsky, Samuel Johnson, Aristotle, Orwell, Osler, Chaucer, Schweitzer, Shakespeare, Thorwalds, Kafka and William Carlos Williams. Such references are used not merely as an artistic and decorative leitmotif, but become a critical, narrative element and another complex and rich layer to this work. The breadth and quality of the references are testimony to the author's clear understanding of the modern law and literature movement. This work provides the basis of a medical school course. As many medical educators as possible should also be encouraged to read this work for the insights it will give them into using their own personal life narratives and those of their patients to inform their decision-making process. This thesis will also be of value to the judiciary, whose members are often called upon to make

normatively difficult judgments about medical care and medical rules. The human rights material leads to a hopeful view of an international movement toward a universal synthesis between medical ethics and human rights in all doctor-patient relationships.
