Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

This timely, authoritative volume provides an integrative review of current knowledge on child and adolescent depression, covering everything from epidemiology and neurobiology to evidence-based treatment and prevention. From foremost scientist-practitioners, the book is organized within a developmental psychopathology framework that elucidates the factors that put certain children at risk and what can be done to help. Proven intervention models are discussed in step-by-step detail, with coverage of cognitive-behavioral, interpersonal, and pharmacological approaches, among others. Special topics include sex differences in depression, understanding and managing suicidality, and the intergenerational transmission of depression.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

All the fundamentals. No fluff. Learn more with less! A truly revolutionary American Government textbook, Christine Barbour's AmGov: Long Story Short, responds to the needs of today's students and instructors through brevity and accessibility. The succinct ten chapters are separated by tabs that make it easy to skim, flip, revisit, reorient, and return to content quickly. Reading aids like bullets, annotations and arrows walk students through important facts and break up the material in short, engaging bites of information that highlight not only what is important but why it's important. Though brief, this core book is still robust enough to provide everything that students need to be successful in their American Government course. Whether for the on-the-go student who doesn't have time to read and digest a lengthy chapter, or the instructor who wants a book that will stay out of their way and leave room for plenty of supplementary reading and activities, AmGov provides a perfectly simplified foundation for a successful American Government course.

Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

"Noise/Music" looks at the phenomenon of noise in music, from experimental music at the early 20th century to the Japanese noise, music and glitch electronica of today, ... While it provides an excellent historical overview, the book's main conern is in the noise/music that has emerged since the mid 1970s, whether through industrial music, punk, free jazz or the purer noise of Merzbow. The book progresses seamlessly from discussions of John Cage, Erik Satie and Pauline Oliveros through to bands like Trobbing Gristle and the Boredoms. The author also examines the concept of noise from a philosophical perspective. Underpinned throughout by the ideas of Adorno, Deleuze and others, the author's writing is sharp and erudite. -- Summarized from back cover.
