Hamburg, Ph.D., explains how compatibility is the key to lasting love. You hear and read a lot about ways to improve your relationship. But if you've tried these without much success, you're not alone. Many highly reactive couples—pairs that are quick to argue, anger, and blame—need more than just the run-of-the-mill relationship advice to solve their problems in love. When destructive emotions are at the heart of problems in your relationship, no amount of effective communication or intimacy building will fix what ails it. If you're part of a "high-conflict" couple, you need to get control of your emotions first, to stop making things worse, and only then work on building a better relationship. The High-Conflict Couple adapts the powerful techniques of dialectical behavior therapy (DBT) into skills you can use to tame out-of-control emotions that flare up in your relationship. Using mindfulness and distress tolerance techniques, you'll learn how to deescalate angry situations before they have a chance to explode into destructive fights. Other approaches will help you disclose your fears, longings, and other vulnerabilities to your partner and validate his or her experiences in return. You'll discover ways to manage problems with negotiation, not conflict, and to find true acceptance and closeness with the person you love the most.

Grounded in a deep understanding of what makes intimate relationships succeed, this book provides concrete guidelines for addressing the complexities of real-world clinical practice with couples. Leading couple therapist Ellen Wachtel describes the principles of therapeutic interventions that motivate couples to alter entrenched patterns, build on strengths, and navigate the “legacy” issues that each person brings to the relationship. She illuminates the often unrecognized choices that therapists face throughout the session and deftly explicates their implications. The epilogue by Paul Wachtel situates the author's pragmatic approach in the broader context of contemporary psychotherapy theory and research.
