Who can use Bright Futures? -Child health professionals and practice staff who directly provide primary care -Parents and youth who participate in well-child visits -Public Health Professionals -Policymakers -Pediatric Educators -MD Residents

As a new physician, you face numerous questions: How do you decide what type of medicine to practice? How should you prepare for your residency interview? Where do you want to settle after your training? Dr. Rashed Hasan, a pediatrician, knows that it's not always easy to answer that question. He offers advice that can help you decide what's right for you, answering the questions above and also providing insights on determining the right time to buy a home; negotiating contracts with hospitals; building a sound financial life; deciding whether to open your own practice or join a group; and navigating the tax code to maximize earnings. He includes practical information for new and established physicians on a variety of topics, such as improving leadership skills, maintaining health, responding to malpractice claims, and preparing for retirement. Hasan also explores the ramifications of recent changes to the health care system, including the Affordable Care Act. While it isn't perfect, the medical profession can be everything you dreamed it would be when you learn how to build your future today.

Poor diet and inadequate physical activity cause more than 300,000 deaths each year in America and are major contributors to disabilities that arise from diabetes, obesity and strokes. This guide explains how to create or improve nutrition, physical activity and obesity programmes.

Dental caries has been called a “silent epidemic” and is the most prevalent chronic disease affecting children. Though much has been written on the science and practice of managing this disease, publications are diverse in their loci, preventing easy access to the reader. *Early Childhood Oral Health* coalesces all the important information related to this topic in a comprehensive reference for students, academics, and practitioners. This second edition expands the scope of the first and puts an additional focus on interprofessional and global efforts that are necessary to manage the growing disease crisis and screening and risk assessment efforts that have expanded with the boom of new technologies. With updated references and incorporating the latest research, chapters address the biology and epidemiology of caries, the clinical management of early childhood caries, risk assessment, and early diagnosis. Other topics include public health approaches to managing caries worldwide, implementation of new caries prevention programs, fluoride regimens, and community programs, and family oral health education. Brand new are four chapters on the medical management of early childhood caries, considerations for children with special needs, interprofessional education and practice, and how the newest policy issues and the Affordable Care Act affect dental care. A must-read for pediatric dentists, cariologists, public health dentists, and students in these fields, *Early Childhood Oral Health* is also relevant for pediatricians and pediatric nursing specialists worldwide.

The twentieth century bequeathed us a fabulous gift: thirty more years of life on average. Supersized life spans are going to radically alter society, and present an unprecedented opportunity to change our approach not only to old age but to all of life's stages. The ramifications are just beginning to dawn on us.... yet in the meantime, we keep thinking about, and planning for, life as it used to be lived. In *A Long Bright Future*, longevity and aging expert Laura Carstensen guides us into the new possibilities offered by a longer life. She debunks the myths and misconceptions about aging that stop us from adequately preparing for the future both as individuals and as a society: that growing older is associated with loneliness and unhappiness, and that only the genetically blessed live well and long. She then focuses on other important components of a long life, including finances, health, social relationships, Medicare and Social Security, challenging our preconceived notions of “old age” every step of the way.
