This documentation is for an unsupported version of PostgreSQL. ... As of PostgreSQL 8.4 this is no longer allowed. psql is only guaranteed
to work smoothly with servers of the same version. That does not mean other combinations will fail outright, but subtle and not-so-subtle
problems might come up. Backslash commands are particularly likely to fail if the server is of a newer version than ...

PostgreSQL: Documentation: 13: 51.91. pg_timezone_abbrevs

By default the driver collects all the results for the query at once. This can be inconvenient for large data sets so the JDBC driver provides a means of basing a ResultSet on a database cursor and only fetching a small number of rows.. A small number of rows are cached on the client side of the connection and when exhausted the next block of rows is retrieved by repositioning the cursor.
