This fascinating addition to the best-selling Who Was...? series does not settle questions of theology. Instead, it presents young readers with a biography that covers what is known historically about Jesus and places in his life in the context of his world when Jerusalem was part of the Roman Empire. In an even-handed and easy-to-read narrative, this title—illustrated with eighty black-and-white drawings—also explains the early origins of Christianity and how it became a major religion.

Despite Rives and Skye's attempt to destroy Nil, the island remains. And back in this world, Nil won't let Skye go. Haunted by a darkness she can't ignore, Skye wrestles with Nil nightmares that worsen by the day and threaten to tear her apart. As the island grows in power, Skye fights to keep her mind intact. Soon Skye realizes that to break free of Nil, she must end Nil's vicious cycle once and for all--and she can't do it alone. Who are Nil's new arrivals? Who will return to the island? And who will survive in the end? In this thrilling final installment of the Nil series, the stakes have never been higher. Losing isn't an option, but winning will cost Skye everything.

An intriguing novel with a classic feel, featuring three vividly alive young sisters, an eccentric family struggling against the odds, and the slowly revealed story of a house with a past.

Written by Peter Moon and Radu Cinamar, a highly placed Romanian intelligence operative, this book heralds the most remarkable archaeological find in the annals of Mankind. Unbeknownst to most, there is an ancient sphinx located in the Bucegi Mountains of Romania. In 2003, the Pentagon discovered, through the use of satellite technology, an anomaly beneath this ancient sphinx. Through the highest levels of Freemasonry, the Pentagon was able to secure an alliance with the most secret department of the Romanian Intelligence Service which is known as Department Zero. Together, the Romanians and the Americans utilised the Pentagon's secret technology to penetrate a hidden chamber beneath the sphinx which was otherwise inaccessible to humans. What was discovered eventually was a holographic Hall of Records left by an advanced civilisation near three mysterious tunnels leading into the Inner Earth. The book chronicles the discovery of these modern day artefacts which represent the dawn of a new era for Mankind. Peter Moon is brought into the fold through his friend, Dr David Anderson, the mysterious scientist who founded the Time Travel Research Center on Long Island and also maintains a similar facility in Romania. Recognising that such satellite technology would had to have utilised Dr Anderson's proprietary space-time technology for maintaining satellites in orbit, Peter Moon pursues these matters further and accepts Dr Anderson's invitation to Romania where he visits the Romanian Sphinx and learns of a mysterious association between the mysterious time travel scientist and Radu Cinamar.

The main problems faced by scientists in working with Big Data sets, highlighting the main ethical issues, taking into account the legislation of the European Union. After a brief Introduction to Big Data, the Technology section presents specific research applications. There is an approach to the main philosophical issues in Philosophical Aspects, and Legal Aspects with specific ethical issues in the EU Regulation on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (Data Protection Directive - General Data Protection Regulation, "GDPR"). The Ethics Issues section details the specific aspects of Big Data. After a brief section of Big Data Research, I finalize my work with the presentation of Conclusions on research ethics in working with Big Data. CONTENTS: Abstract 1. Introduction - 1.1 Definitions - 1.2 Big Data dimensions 2. Technology - 2.1 Applications - - 2.1.1 In research 3. Philosophical aspects 4. Legal aspects - 4.1 GDPR - - Stages of processing of personal data - - Principles of data processing - - Privacy policy and transparency - - Purposes of data processing - - Design and implicit confidentiality - - The (legal) paradox of Big Data 5. Ethical issues - Ethics in research - Awareness - Consent - Control - Transparency - Trust - Ownership - Surveillance and security - Digital identity - Tailored reality - De-identification - Digital inequality - Privacy 6. Big Data research Conclusions Bibliography DOI: 10.13140/RG.2.2.11054.46401

Haunting, gripping, and psychologically fierce tales that illuminate an unsettling side of humanity from “one of the treasures of American story writing” (Jonathan Lethem). Featuring the O. Henry Prize-winning short story “Windeye,” this collection of Brian Evenson’s masterful stories “involve impossible scenarios and alternative realities” that are “always surprising” (Bookforum). A woman falling out of sync with the world; a king’s servant hypnotized by his murderous horse; a transplanted ear with a mind of its own—the characters in these twenty-five stories live as interlopers in a world shaped by

mysterious disappearances and unfathomable discrepancies between the real and imagined, revealing the breadth and depth of Evenson's uncanny vision.

Radu Cinamar is recruited for Department Zero and explores the tunnel from the Bucegi Sphinx chamber to a similar chamber beneath Giza where a time travel device is found.
