Ballistics is the [learning from the shot]. You differentiate between interior ballistics, muzzle ballistics, external ballistics and target ballistics. In case of the ballistic data for RWS rifle cartridges it is not a matter of absolute values, but average values from many measurements with weapons of different brands. For example, due to different barrel lengths the values can be ...

For testing in terms of consistency, the RWS primers were substituted into an already proven 45-70 load and fired through a chronograph. The results were remarkably consistent, with the velocities of over a five-shot string varying by no more than 6 FPS (The printout from the chronograph was witnessed and retained).

This book constitutes the refereed conference proceedings of the 14th IFIP WG 6.11 Conference on e-Business, e-Services and e-Society, I3E 2015, held in Delft, The Netherlands, in October 2015. The 40 revised full papers presented together with 1 keynote panel were carefully reviewed and selected from 65 submissions. They are organized in the following topical sections: adoption; big and open data; e-business, e-services,, and e-society; and witness workshop.

The entirely updated and revised *Ammo & Ballistics 6* is now available and is better than ever! *Ammo & Ballistics 6* contains data and illustrations on virtually every sporting cartridge sold in the USA. Besides clear and concise writing that clarifies the complexities of ballistic coefficients and energy versus momentum, this revised edition covers 200-plus calibers . . . from the .17 Mach 2 to the .700 Nitro Express. It contains information on rifle and handgun calibers, and it covers manufacturers, bullet weights, types, and construction. In addition, each caliber has an exact technical drawing with all dimensions and angles. There are over 3,000 tables with ballistic data for every caliber and every load for all commercially loaded hunting ammunition sold in the United States. Tables include velocity, energy, wind drift, bullet drop, and ballistic coefficients up to 1,000 yards. Manufacturers include A-Square, Aguila, ATK, Black Hills, CCI/Speer, Cor-Bon Bullet, Dakota Arms, Eley Ltd., Federal Cartridge, Fiocchi, Hirtengerger, Hornady, Patria Lapua Oy, Lazzeroni, Kynoch (Kynamco Ltd.), MagTech, Norma, Nosler, Inc., PMC (Eldorado Cartridge Corp.), Remington, Dynamit (Nobel-RWS

Inc.), Sellier and Bellot, Ultramax, Weatherby, and Winchester. If you want to know where you will be hitting at long distances, this is the book for you. This book is, quite literally, indispensable for the hunter or shooter.

Few books on statistical data analysis in the natural sciences are written at a level that a non-statistician will easily understand. This is a book written in colloquial language, avoiding mathematical formulae as much as possible, trying to explain statistical methods using examples and graphics instead. To use the book efficiently, readers should have some computer experience. The book starts with the simplest of statistical concepts and carries readers forward to a deeper and more extensive understanding of the use of statistics in environmental sciences. The book concerns the application of statistical and other computer methods to the management, analysis and display of spatial data. These data are characterised by including locations (geographic coordinates), which leads to the necessity of using maps to display the data and the results of the statistical methods. Although the book uses examples from applied geochemistry, and a large geochemical survey in particular, the principles and ideas equally well apply to other natural sciences, e.g., environmental sciences, pedology, hydrology, geography, forestry, ecology, and health sciences/epidemiology. The book is unique because it supplies direct access to software solutions (based on R, the Open Source version of the S-language for statistics) for applied environmental statistics. For all graphics and tables presented in the book, the R-scripts are provided in the form of executable R-scripts. In addition, a graphical user interface for R, called DAS+R, was developed for convenient, fast and interactive data analysis. Statistical Data Analysis Explained: Applied

Environmental Statistics with R provides, on an accompanying website, the software to undertake all the procedures discussed, and the data employed for their description in the book.

The completely revised and updated Ammo & Ballistics 3 is now available and better than ever! Ammo & Ballistics 3 contains data and illustrations on virtually every sporting cartridge sold in the USA. Besides clear and concise writing that clarifies the complexities of ballistics coefficients and energy versus momentum, this revised edition covers 160-plus calibers from the .17 Mach2 to the .700 Nitro Express. It contains information on rifle and handgun calibers, and it covers manufacturer, bullet weight, type, and construction. There are over 2,200 tables with ballistic data for every caliber and every load for all commercially loaded hunting ammunition sold in the United States. Tables include velocity, energy, wind drift, bullet drop, and ballistic coefficient up to 1,000 yards. Manufacturers include A-Square, Aguila, Black Hills, CCI/Speer, Cor-Bon Bullet, Dakota Arms, Eley Ltd., Federal Cartridge, Fiocchi, Hirtenberger, Hornady, Patria Lapua Oy, Lazzeroni, Kynoch (Kynamco Ltd.), MagTech, Norma, PMC (Eldorado Cartridge Corp.), Remington, Dynamit Nobel-RWS Inc., Sellier and Bellot, Ultramax, Weatherby, and Winchester. Book jacket.

This book presents a collection of papers on topics in the field of strategic mine planning, including orebody modeling, mine-planning optimization and the optimization of mining complexes. Elaborating on the state of the art in the field, it describes the latest technologies and related research as well as the applications of a range of related technologies in diverse industrial contexts.

The second of two volumes from the 1999 conference (v.1 was published in 1999) makes available the opening lecture on pre-failure behavior of soils as construction materials, as well as 24 contributions on various themes of the conference, laboratory tests, in situ tests, stress-strain behavior, applications and case histories. Some specific topics include time-dependent deformation characteristics of stiff geomaterials, boundary value problems in geotechnical engineering, and the effect of reinforcement due to choice of geogrid. There is no subject index. c. Book News Inc.
