The OECD Skills Strategy provides a strategic and comprehensive approach for ensuring that people and countries have the skills to thrive in a complex, interconnected and rapidly changing world. The updated 2019 OECD Skills Strategy takes account of the lessons learned from applying the original skills strategy in 11 countries since 2012, while also incorporating new OECD evidence about the skills implications of megatrends, such as globalisation, digitalisation, population ageing, and migration. The Strategy also incorporates new learning from across the OECD about skills policies that work in these three broad components: developing relevant skills over the life course, using skills effectively in work and society, and strengthening the governance of skills systems.

A number of countries have recently discovered and are developing oil and gas reserves. Policy makers in such countries are anxious to obtain the greatest benefits for their economies from the extraction of these exhaustible resources by designing appropriate policies to achieve desired goals. One important theme of such policies is the so-called local content created by the sector—the extent to which the output of the extractive industry sector generates further benefits to the economy beyond the direct contribution of its value-added, through its links to other sectors. While local content policies have the potential to stimulate broad-based economic development, their application in petroleum-rich countries has achieved mixed results. This paper describes the policies and practices meant to foster the development of economic linkages from the petroleum sector, as adopted by a number of petroleum-producing countries both in and outside the Organisation for Economic Co-operation and Development. Examples of policy objectives, implementation tools, and reporting metrics are provided to derive lessons of wider applicability. The paper presents various conclusions for policy makers about the design of local content policies.

Value-creation in Middle Market Private Equity by John A. Lanier holistically examines the ecosystem relationships between middle market private equity firms and their portfolio companies. Small business is the job creating engine in the US economy, and consequently is a prime target market for private equity investment. Indeed, private equity backs over six of each 100 private sector jobs. Both the small businesses in which private equity firms invest, and the private equity firms making the investments, face inter- and intra-company fiduciary leadership challenges while implementing formulated strategy. The architecture of each private equity firm-portfolio company relationship must be uniquely crafted to capitalize on the projected return on investment that is memorialized in the investment thesis. Given the leveraged capital structure of portfolio companies, the cost of a misstep is problematic. Individual private equity professionals are typically members of multiple investment teams for the firm. Not only may each investment team have its own unique leadership style, but its diverse members have to assimilate styles for each team in which they participate relative to a specific portfolio company. Acquisitions and their subsequent integrations add exponential complexity for both private equity investment and portfolio company leadership teams; indeed, cultural integration ranks among the most chronic acquisition obstacles. Accordingly, the stakeholders of private equity transactions do well to embrace leadership best practices in applying value-creation toolbox best practices. The perspectives of both the private equity investment team and the portfolio company leadership team are within the scope of these chapters.

This report describes the world economic outlook as of April 2018, projecting that advanced economies will continue to expand above their potential growth rates before decelerating, while growth in emerging markets in developing economies will rise before leveling off. It details global prospects and policies, including risks to the forecast, and essential determinants of long-term economic growth: labor force participation in advanced economies, the declining share of manufacturing jobs globally and in advanced economies, and the process through which innovative activity and technological knowledge spread across national borders.

The goal of this book is to define Sustainable Value Creation in terms of a set of principles that differentiate it from existing definitions of CSR, and from related concepts such as sustainability and business ethics. To internalize these ten principles is to understand how the firm can respond to stakeholder needs to optimize value creation over the medium to long term. Ultimately, this second edition book aims to reform both business practice and business education. By building a theory that redefines CSR as central to the value creation process, the ten principles of Sustainable Value Creation redefine how firms approach each of their operational functions, but also how these subjects should be taught in universities worldwide. As such, this book will hopefully be of value to instructors as a complement to their teaching, students as a guide in their education, and managers as a framework to help them respond to the complex, dynamic context that they are expected to navigate every day. This book is a manifesto for success in today's complex, dynamic business environment. The book is designed as an easy-to-digest, critical introductory text to CSR. With supporting online teaching resources, it is aimed primarily at the MBA and Executive MBA market, and for CSR, sustainability, and business ethics courses taught by instructors skeptical of existing definitions and organizing principles of CSR, sustainability, or business ethics.

ÓThis book describes a number of different empirical studies and evaluations of the international brewery industry. This industry has recently undergone two climactic changes within a ten to fifteen year time period. These are a significant industry-wide consolidation of firms and market shares accompanied by the internationalization of what was previously a largely local industry. Understanding the drivers and implications of such abrupt and massive change in the competitive environment of an industry is of great interest to international and strategic management scholars. Most of the book's chapters address this issue, some at the global industry level, some at a regional level, and some at the level of a specific country. Taken together, they comprise an insightful case study of an interesting industry at its most interesting point in time.Ó Æ William G. Egelhoff, Fordham University, US ÓThe individual contributions in this volume paint a varied and rich picture of strategies and rivalries, the role of environments and institutions, leadership and also customer approaches in both global and local brewery industry. Some of the analysed phenomena are more standard to an IB audience, like consolidation, technological development, and shifts in global markets, but they get a specific flavor and color through this industry focus, while other topics definitely seem more specific (like ÓBierstrasseÓ on Mallorca). For readers with good taste.Ó Æ Rian Drogendijk, Uppsala University, Sweden This unique book explores some of the key topics of international business through the context of a global industry, focusing on the challenges brewery companies face as they operate in globalized markets. It examines the strategies of individual firms to develop markets and explores new insights into recent company rivalries, both globally and locally. In addition, it offers detailed analysis of some of the major players in the industry through longitudinal studies. Drawing on a range of perspectives, the contributing authors explore six overarching themes: international market developments and firm performance; host country institutional effects; multi-point competition and rivalries; cross-border M&A integration and subsidiary development; leadership and internationalization; and boundless customer interfaces through such elements as social media and tourism. The Global Brewery Industry will prove insightful for scholars across international business, as well as providing an appealing case study for advanced students. It will be invaluable to those investigating the brewery sector specifically, or working with brewing firms.

This book aims at illustrating the OBOR Initiative (also known as "Belt and Road Initiative" or BRI), its many facets, including its background, and how the Chinese government intends to develop this ambitious project. It describes in detail the role and involvement of Institutions (lenders, in particular) in the OBOR Initiative. It offers guidance on how interested parties can participate in the different projects connected to the Initiative. The views of the authors, on the main aspects of this Initiative, serve as suggestions to parties interested in taking part in this Initiative. The book provides an exceptional amount of information about how projects connected to the BRI Initiative are financed and developed. The involvement of UBS clearly shows that financial institutions are interested in financing the Initiative. There is a special focus on the relationship between China and the EU, because the scope of this Initiative is not only to boost trade relationships between the two regions but also create new opportunities for all the countries along the new Silk Road. Contents: "Belt & Road Initiative" as a Continuation of China's Reform and Opening Up and as a Consequence of the Beijing Consensus (Xugang Yu) China and the "Belt and Road" Initiative: What Is It All About? (Xugang Yu and Cristiano Rizzi) The First Pillar of the B&R Initiative Funding: The Institutional Funding (Cristiano Rizzi and Mario Tettamanti) The Second Pillar of the OBOR Funding: The Private Sector (Mario Tettamanti) The Second Pillar of the B&R Initiative Funding: The Private Sector (Mario Tettamanti) Global Implications of the "B&R" Initiative and Its Impact on the EU Economy (Cristiano Rizzi and Mario Tettamanti) EU Infrastructure Priorities Connected to the B&R Initiative, and the Necessity for Coordinated Efforts with China in Developing the B&R Initiative (Cristiano Rizzi) Relations between China and Italy: The Development of Diplomatic Ties and the Impact of the B&R Initiative and a Brief Overview on the EU and Italian Rules Regulating Public Works (Cristiano Rizzi) The Impact of the B&R Initiative on the Development of International Law, Particularly of the Law of Carriage of Goods and of "International Business" (Fabio E Ziccardi) Readership: Policymakers, academics, professionals, undergraduate and graduate students interested in China's One Belt One Road Initiative, financial, China's outbound investment and China-EU relations. Keywords: One Belt One Road;Infrastructure;Transportation;Outbound Investment;Merger and Acquisition;Funding;China-EU RelationsReview:0
