This book is intended to complement the author's 1996 book "The geology of fluvial deposits", not to replace it. The book summarizes methods of mapping and interpretation of fluvial depositional systems, with a detailed treatment of the tectonic, climatic and eustatic controls on fluvial depositional processes. It focuses on the preserved, ancient depositional record and emphasizes large-scale (basin-scale) depositional processes. Tectonic and climatic controls of fluvial sedimentation and the effects of base-level change on sequence architecture are discussed. Profusely illustrated and with an extensive reference to the recent literature, this book will be welcomed by the student and professional geologist alike.

Do you feel that life is very complex and you have little control over what happens? Would you like to gain more clarity on the elements that make up human life so you can make better decisions? Would you like to increase your levels of well-being permanently? With this model called Life Strategy you can learn to do all these things and much more. This model takes into account the most important elements of human life and teaches you how all those elements work to give you the levels of well-being you desire. Through its practical process you can apply all these teachings in your life starting out by the things that make you unique and your particular circumstances.
