Union and the area of pharmaceuticals is no exception to this tendency. As this book shows, global pharmaceutical standards set by the International Council for Harmonisation of Technical Requirements for the Registration of Pharmaceuticals for Human Use (ICH), after they are adopted through the European Medicines Agency (EMA), are an important feature of the regulatory framework for pharmaceuticals in the EU. In addition to analysing the influence of these global standards in the EU legal and policy framework, the book questions the legitimacy of the Union's reliance on global standards

With the New Approach, the EU has incorporated European standardisation in its regulatory approach to improve the free movement of goods. Such a New Approach does not exist for services. Nevertheless, a significant number of European services standards have been made. This book focuses on European standardisation of services and

its impact on private law. Two services sectors are analysed: the healthcare sector and the tourism sector. The core chapters of the book contain a number of case studies based on empirical research in these sectors. The first part discusses how European services standards interact with existing legal regulation at the European and national level. It is shown that, at the European level, there is no clear legal framework in which European services standards are adopted. This has an impact on their application in private law, which is the main theme of the second part of the book.

## Acces PDF Standards Regulations Legrand

Moreover, there is a real risk that European services standards create obstacles to free movement. This will prevent their successful application in private law.
