Who makes land use decisions, how are decisions made, and who influences whom, how and why? This working paper is part of a series based on research studying multilevel decision-making institutions and processes. The series is aimed at providing insight into why efforts to keep forests standing, such as initiatives like Reducing Emissions from Deforestation and Forest Degradation (REDD+), are still so far from altering development trajectories. It underlines the importance of understanding the politics of multilevel governance in forest, land and climate policy and practice, and identifies potential ways forward.

Bridge the gap between research and practice with Introduction to Research: Understanding and Applying Multiple Strategies, 5th Edition. This easy-to-read edition covers all the major research design strategies: qualitative, quantitative, naturalistic, experimental-type, and mixed method. And with the text 's up-to-date research information and references, you will have a solid foundation from which to critique and understand research designs and their applications to healthcare and human service settings. Case examples provide real-life snapshots of what it is like to participate in different types of research processes, identify research dilemmas relevant to chapter subjects, and alert you to problems you might encounter. Authors make the topics more accessible, so research becomes more relevant - and topics come to life. Covers experimental-type, naturalistic, and mixed method design strategies to improve your ability to compare, contrast, and integrate different methods. Presents complex information clearly in a highly readable, and easy-to-understand, manner. Includes detailed discussions of

qualitative and quantitative methodologies, a unique and balanced focus that makes this text more comprehensive than others in its field. NEW! Up-to-date research methods, strategies, and references, like digital sources, visual methods, and geographical analysis, give you the latest information on research in diverse areas of health and human services.

This innovative series is designed to help primary teachers plan focused sessions on the work of popular, well-loved and valued authors, both classic and contemporary. Each book contains a range of activities for use directly in the classroom, covering biographical information about the author; a review of the author's work and a summary of major themes in his/her key texts; key language features of the author; frameworks to help children analyze, evaluate and compare texts, and to develop personal opinions of authors' works; ideas for writing modeled on or developed from key texts; speaking and listening opportunities; drama and role play ideas; and references to video, CD-ROM, websites and ICT activities. Inside each book is a full-color pullout poster illustrating the work of the author, which also has a set of challenges for children on the back. David McKee is an author and illustrator, creator of Mr Benn, King Rollo, and the ever-popular patchwork elephant, Elmer. Building on children's enjoyment of the characters and their adventures, this book presents activities that focus on narrative structure, character development, settings and themes. Most importantly, the activities are designed to make learning about stories as much fun as reading them. Games and activities include: fortunately/unfortunately and chain of events - exploring cause and effect; comparing plots - using a matrix to order information; looking for clues about Elmer - building a character sketch; mapping feelings - exploring character development; time talk and Isabel's diary - understanding setting, sequence and relationships between the two; making a story map - recognizing picture and context clues; comparing the video to the written text; and text detective work using extracts.
